Total Invested Projects

Developed by Aging Analytics Agency, the Top-50 Longevity Charities report contains a comprehensive overview of the global Longevity charities and non-profit sector on the whole.

Using complex approach to measure the performance and impact of Longevity-focused charities, the report could ensure in-depth comparative analysis of the non-profit Longevity organisations operating worldwide. It provides potential donors with the up-to-date information and help to donate to charities with a strong chance of making practical progress in Longevity industry.

The primary goal of the report is to systematise and evaluate the complex basis of the non-profit organisations in the field of biomedicine and

biotechnology since the emergence of the global Longevity industry over the past few years. Analysed charities are active in the most complex and multifaceted fields of science and technology in order to prolong human lives, improve health, study diseases and find their treatment so that these sicknesses never spread again.

The report focuses on 50 charities that are assessed according to 8 indicators: Finance & Economy, Coverage Volume, Services Volume, Social Engagement, Social Impact, Innovative outputs, Governance Effectiveness, and Transparency.
