

Dashboards Constructor

Big Data Software Operations System

Dashboard Constructor represents a paradigm shift in customizable, white label solutions, empowering businesses to effortlessly create visually striking and interactive dashboards tailored precisely to their requirements. Its intuitive interface and robust functionalities ensure the seamless delivery of data-driven insights, fundamentally transforming the visualization and utilization of information.

This project amalgamates three foundational **Deep Knowledge Group** initiatives:

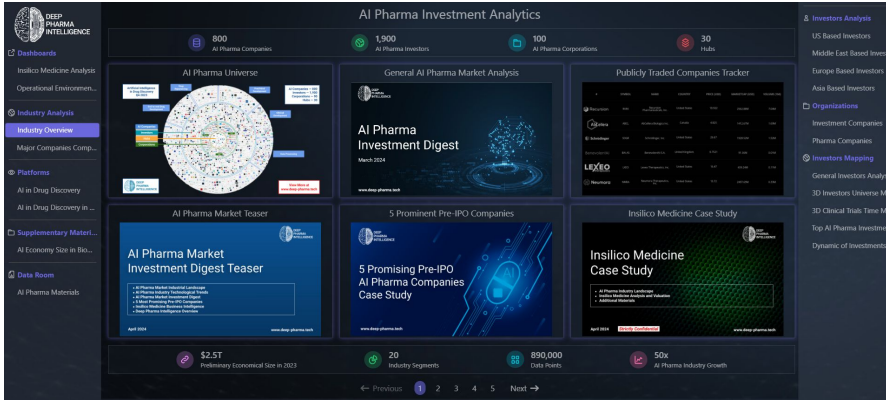

- Firstly, it encompasses the comprehensive collection of Big Data from Dashboard Projects.
- Secondly, it incorporates a flexible, no-code approach to visualization composition akin to Dashboard Constructor.
- Lastly, it integrates the interactive visualization of intricate datasets, including interactive Mind Maps. This convergence establishes it as an all-encompassing solution for large-scale data visualization.

Continual integration of custom-diagram visualizations, aligned with specific data types, significantly enhances its adaptability and usability. Furthermore, the extraction and integration of selected visual components from dashboards into the platform serve to augment its suite of features.

Advanced Visualization. Dashboards Constructor

Key Features

E

Enables the creation of tailored and personalized analytical dashboards in a matter of minutes

A

All features that are available on other dashboards are already enabled

S

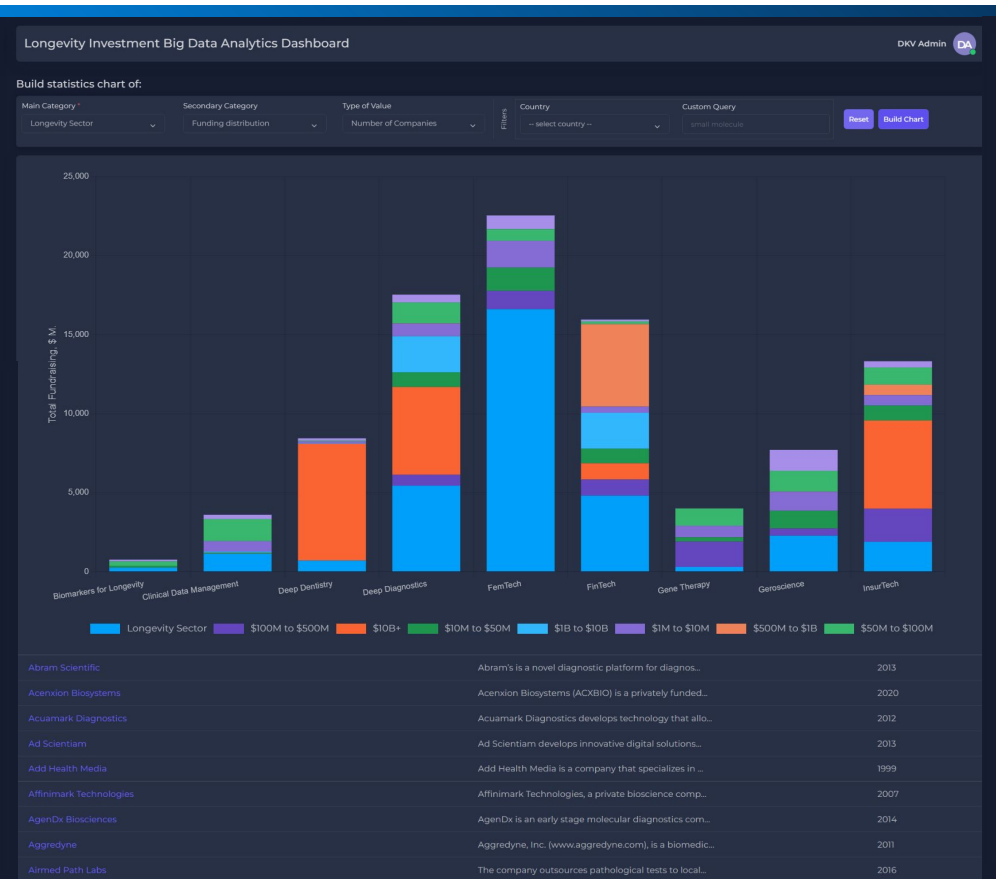

Save time and money on analyst training with a low-code solution

Y

You are the one who decides - purchase a white label solution or request creation-on-demand

Advanced Visualization. Interactive Chart Builder

Key Features

- Interactive market coverage
- Custom queries for maximum personalization of industry outlook
- 50,000+ represented entities
- 5+ entity layers types

Advanced Visualisation. Three.Js Implementation for Diagrams Constructor

Key Features

P

Personalized approach for data visualization

L

Less time – more results. Achieve your goals with a low-code solution

A

All features and visualization approaches in one place

Y

Your vision = our solution. Analyse, present and pitch without limits

K

Kick-start the solution with the same DSSM approach, allowing data management optimization

N

Nested tagging approach for in-depth search

O

Oftenly-updated and curated database to keep-up with the companies' changes

VV

Vertical Value chain: B2B focus

The Operational Framework of Dashboard Constructor Entails:

Effortlessly connect to your existing systems and data sources with minimal setup

Tailor dashboards to reflect your brand for a cohesive visual identity

Create interactive dashboards effortlessly using our drag-and-drop interface

Generate actionable insights using advanced algorithms, presented in engaging formats

Geo Dashboard Constructor

The Geo Dashboards Constructor is a state-of-the-art tool for creating and customizing interactive dashboards efficiently. It integrates maps, graphs, and other data visualizations into a single, cohesive interface. It's a software designed specifically for customizing dashboards for geographical data visualization and analysis. Users can easily select components to build dashboards tailored to their needs or project specifications.

Interactive MindMap

The Mindmaps Service is an innovative tool for creating and customizing mindmaps with exceptional flexibility. Notably, the tool stands out with sector-specific segmentation, allowing users to analyze and visualize data within specific industry sectors for a more detailed perspective. Additionally, it enables the integration of various entity types in a single mindmap, offering valuable insights into complex business relationships and ecosystems. These advanced features make it invaluable for detailed data analysis and visualization.

Benchmark Interactive Tools

DKG's Benchmark Tool Pyramid is a powerful and flexible tool for data visualization and benchmarking in the oncology sector. It offers users the choice between 2D and 3D visualization for a comprehensive view of data. What sets DKG apart is its user-friendly Admin Panel, which facilitates customization through JSON file editing. Its combination of user input capabilities and a robust Admin Panel makes DKG's Benchmark Tool Pyramid a standout choice for tailored benchmarking and data visualization needs.

Complex Frameworks

DKG's Complex Frameworks tool is a sophisticated platform for understanding complex relationships and data evolution. The primary visualization area showcases interconnected nodes and paths that represent data entities and their relationships. A timeline slider empowers users to explore data evolution across different years with real-time updates. Interactivity is a key feature, allowing users to select nodes and paths for detailed insights.

www.deep-innovation.tech/complex-frameworks

3D Multidimensional Space

3D Multidimensional Space offers an innovative approach to visualizing complex data connections and hierarchies. It utilizes a cylindrical three-dimensional structure to represent entities, distinguishing between companies, investors, and funding rounds with distinct colors. What sets DKG apart is its Special Slider Filter, allowing users to filter visible entities based on specific criteria like capitalization or date ranges. The tool promotes interactive exploration, enabling users to zoom in on nodes for detailed information and providing panning and rotating features for comprehensive analysis.

Complex Evolution Trees SaaS

Complex Evolution Trees SaaS, a sophisticated visualization tool designed for creating, managing, and analyzing evolutionary trees across various timescales. It is ideal for historians, biologists, and other researchers who require a visual representation of complex lineage or evolution data. With its intuitive interface and customizable features, users can effortlessly explore and dissect intricate connections within evolutionary data, making it an indispensable asset in uncovering the nuances of biological and historical evolution.

InvestTech Platform Application 1.0

InvestTech is a SaaS platform that enables users to invest in startups and other ventures with ease. Our platform leverages the power of machine learning to help users discover interesting investment opportunities that match their preferences and investment goals. Whether you're a seasoned investor or a novice looking to get started, our platform provides the tools and insights you need to make informed investment decisions.

www.deep-innovation.tech/investtech-saas

What is InvestTech Platform SaaS?

Covering both front end and back end platform technology, and developed by an international consortium with 10 years of excellence in tech industry investment, the platform leverages the power of machine learning to help users discover opportunities that match their preferences and investment goals, provides a range of useful instruments to help users manage the legal and administrative aspects of investing, and includes tools for creating and managing contracts, dealing with documents, and handling other legal tasks.

Key Platform Highlights

- Investor Relationship Management System Integration: Explore investors, view insights and connect with investors
- Data Room: Secure Documents Storage
- Deal Analytics: Insights of deal viewers and downloaded documents
- Automated Documents Signing: Document integration, pre-loaded templates
- KYC/KYB Procedures: SumSub Integration

Discover Tech Economy Set of Front-End Visualisation Tools Solution

This ultimate toolkit provides a flexible and innovative solution for creating, customizing, and visualizing interactive graphs and charts that inform and captivate.

Deep Knowledge Group Presents

Tech Set of Front-End Visualisation Tools

Tech Economy Set of Front-End Visualisation Tools is a dynamic suite designed to redefine the way businesses interpret and present data. This cutting-edge tool places interactivity at its core, ensuring that every graph and chart tells a compelling story with a simple click. The seamless integration of diverse data sources empowers users to extract meaningful insights effortlessly. Moreover, its intuitive interface caters to both seasoned analysts and newcomers, fostering a collaborative environment for data-driven decision-making across all levels of expertise.
