Statistics allows creating the charts based on the user's desired parameters. Relying on the extensive database, this tool can visualize the data about organizations operating in the Longevity industry.

- Easy-to-use tool for data visualization
- Data for charts is aggregated from a large number of external sources
- Clearly represented comparisons of parameters on the charts

Aging Analytics Agency - the world's premier Longevity Analytics provider, dedicated to the production of analytical reports on the topics of Longevity, Precision Preventive medicine and AgeTech. Operating for over five years, it began producing in-depth reports on Longevity long before it emerged as an industry. The company also provides strategic consulting in the fields of Longevity and Economics of Aging. Aging Analytics Agency has been developing enhanced iterations of its proprietary methodology and analytics system since 2015, and serve as the main source of market intelligence for the specialized hybrid index hedge fund Longevity.Capital
