## Tech and Innovation Ecosystem of Moldova Beta Version

The Project is developed with technological support of Deep Knowledge Group

The Tech and Innovation Ecosystem of Moldova is a pioneering initiative by Deep Knowledge Group that is set to redefine the narrative of Moldova's key industries and sectors, presenting the country's unique strengths on a global stage. Featuring 3,260 organizations, including 2,820 innovative companies, 400 investors (with 200 being international investors), 80 AI-focused companies, 40 hubs, 15 industries, 5 publicly traded companies, and 4,000 leaders, this platform is a testament to Moldova's prowess. The project implements a systemic approach, utilizing new front-end visualization IT tools developed by Deep Knowledge Group initially for the Moldova Platform.

This initiative reflects Deep Knowledge Group's commitment to a techno-philanthropic approach and dedication to contributing to their homeland. The project also focuses on establishing cross-learning and collaboration between the Moldova Platform and Invest-Ukraine.Tech, integrating it with Philanthropy.International and the DeepTech in Europe Project.
