7percent Ventures

Summary:	<p>Next generation early stage tech investing, bridging Europe and the USA. 7percent Ventures invest in early stage tech startups which represent billion dollar opportunities.</p> <p>7percent Ventures is not interested in startups which iterate a market, it is interested in startups that transform them. Change is the prerequisite of disruption. To monopolize a market it believes you must fundamentally disrupt it. To do that, you must have a product which solves a painful problem in a better way than existing solutions or serves a need that is not currently being satisfied.</p>

Summary:

NFX operates as a seed and series A venture firm. We believe that creating something of true significance starts with seeing things others do not. As Founders, we reinvented industries with this mindset. As investors, our approach is no different. We do this by asking ourselves one question - ideally, how should the startup experience work for Founders, both NFX and the whole ecosystem? Our lens is always through the eyes of the Founder. Our approach is to first build an early stage experience for all Founders that is powered by more software. Second, to bring the founders we back exponential yet little-known techniques for network effects and growth. Third, to make visible the typically unseen methods of technology's most impactful companies.
