# Aisling Capital

AISLING  
CAPITAL

Aisling Capital believes the next decade will be marked by a revolution in healthcare driven by new therapeutics generated by biotechnology. The completion of the human genome has given scientists new insights into the causes of human disease. These insights, combined with the past 20 years of developments in the biotechnology industry, are leading to rapid expansion of novel approaches toward the diagnosis, prevention, and treatment of life-threatening illnesses. These advances have led to an ever-increasing demand for capital to complete the development and commercialization of new therapeutics. Aisling Capital's goal is to support the leading global healthcare companies that are building on these technical and medical breakthroughs to commercialize new healthcare products.

# Angel CoFund

Angel CoFund invests in small and medium-sized enterprises with high growth potential across the UK.

The Angel CoFund was launched in November 2011. The fund has been created with a grant from the Regional Growth Fund and support from the Business Bank. It invests alongside business angel syndicates from across the UK.

It is a private sector entity with clear objectives to boost the quality and quantity of business angel investing in the UK, and to support long-term, high quality jobs in growing companies. The fund is able to make initial equity investments of between 100K and 1M in to SMEs alongside syndicates of business angels, with an upper limit of 49% of any investment round. It will only make investments alongside Syndicates of business angels, who must be investing in a given business for the first time. Any final decision to invest will be made by the independent Investment Committee of the fund based on the detailed proposals put forward by business angel syndicates. The fund will only make commercial investments. Since its launch the fund has invested in excess of 22M, alongside a further 87M from business angels and other investors, in order to help UK companies grow. In 2013 the fund was increased in size in order to meet demand for investment from both high potential businesses and co-investors.

Website:	<a href="http://angelcofund.co.uk">angelcofund.co.uk</a>
Number of Employees:	1-10

# Angels in MedCity

Angels in MedCity is a partnership between MedCity, London Business Angels and Angels4LifeSciences. The programme aims to introduce new people to investing and investing in the healthcare/life sciences sector via investor workshops and introduce business angels to investment opportunities from highly-selected and trained companies. With a particular focus on drug therapies, digital health and medical device technologies, Angels in MedCity brings potential investors together with life sciences experts in a programme aimed at both people who are new to investing and experienced investors who have little or no experience in the life sciences sector.

The aim is to build investor understanding in the life sciences sector and support life sciences companies to gain funding to commercialise their ideas. The Angels in MedCity initiative is delivered by Newable and MedCity with further expertise from Angels Life Sciences. Angels in MedCity's initiative provides practical support to investors and small businesses that supports investment funding and thereby helps to create jobs in London.

# Archangels

520

Archangels

investing in innovation

Originally formed in 1992 and based in Edinburgh, Archangels is a prominent business angel syndicate which has been at the forefront of early stage investing in Scotland for more than two decades. Today, Archangels comprises more than 60 investor members and typically co-ordinates the investment of more than £10 million per year in early stage Scottish companies.

The Archangels syndicate predominantly invests in companies from the technology, software and life sciences sectors – three markets in which Scotland produces a wealth of talent. The syndicate and its executive team have wide experience in diverse business sectors and disciplines to help and support the creation and development of young companies to maximise investor return.

# Auriens

Some people use the phrase 'over the hill'. At Auriens that just means picking up speed.

Through their beautifully designed properties, world-class services and exceptional healthcare provision, Auriens is dedicated to challenging and subverting the norms of post-retirement (later) living.

They see the advancing years as something to celebrate, and they value agefulness as they do intelligence, attitude, style and sophistication.

At Auriens, their mission is to provide inclusive, comprehensive, centrally located places to live later life to the full. That means the catering is exceptional, the Club and restaurant are stylish places to congregate, and the spa, therapy suites and library are all a joy to linger in. Every requirement, large or small, will be effortlessly satisfied to premium hotel standards and beyond.

# Baillie Gifford

BG

526

Baillie Gifford is one of the UK's leading independently owned investment management firms. It is owned and run by 39 of its senior executives who operate as a partnership. It enables to manage the business for the future as well as the present, with the emphasis on genuine long-term thinking rather than lurching haplessly between short term targets. Baillie Gifford is unique in the UK in being a large-scale investment business that has remained an independent private partnership. This ownership structure has allowed us to keep our efforts focused entirely on our clients and their investments.

# Bank of America Merrill Lynch

Bank of America Merrill Lynch is the corporate and investment banking division of Bank of America. It provides services in mergers and acquisitions, equity and debt capital markets, lending, trading, risk management, research, and liquidity and payments management. It was formed through the combination of the corporate and investment banking activities of Bank of America and Merrill Lynch following the acquisition of the latter by the former in January 2009.

Bank of America completed the acquisition of Merrill Lynch & Co on 1 January 2009. Bank of America began rebranding all of its corporate and investment banking activities under the Bank of America Merrill Lynch name in September 2009. In April 2010, Bank of America Merrill Lynch appointed Christian Meissner as head of investment banking for Europe, Middle East and Africa. In April 2011, Bank of America Merrill Lynch integrated its corporate and investment banking operations into a single division. In October 2013, Bank of America Merrill Lynch was recognised as the Most Innovative Investment Bank of the Year in The Banker's Investment Banking Awards.

# Calculus Capital

At Calculus Capital they are specialists in creating and managing tax efficient private equity funds for the individual. Funds that are ideal for today's market - offering generous tax benefits, and significant growth potential within a sensible risk profile.

Calculus Capital looks to make £2-5 million investments in established companies with proven management teams and a successful product or service. Calculus Capital's entrepreneurial flair, combined with experience and sound commercial judgement has resulted in a diversified investment portfolio and an impressive track record.

The Government has recently shown its support for EIS funds, by maintaining the five generous tax benefits and widening the scope of EIS investments. These changes benefit Calculus Capital's rigorous and proven strategy. As a result we are experiencing our strongest pipeline of prospective investments yet.

# California Institute for Regenerative Medicine

The California Institute for Regenerative Medicine ("The Institute" or "CIRM") was established in early 2005 following the passage of Proposition 71, the California Stem Cell Research and Cures Initiative. The statewide ballot measure, which provided \$3 billion in funding for stem cell research at California universities and research institutions, was approved by California voters on November 2, 2004, and called for the establishment of a new state agency to make grants and provide loans for stem cell research, research facilities and other vital research opportunities.

The mission of CIRM is to support and advance stem cell research and regenerative medicine under the highest ethical and medical standards for the discovery and development of cures, therapies, diagnostics and research technologies to relieve human suffering from chronic disease and injury.

# Cambridge Angels Group

CAMBRIDGE  
ANGELS

The Cambridge Angels are a group of high-net worth investors who have proven experience as successful entrepreneurs in internet, software, technology and biotechnology. Members invest in and mentor high quality start-up and early-stage companies in these sectors in the Cambridge (UK) area and throughout the UK.

Typical funding requirements that the Cambridge Angels meet are in the range of £50,000 to £500,000 - although it is worth noting that several of portfolio companies have received more than £1m in funding from Members over several funding rounds.

Cambridge Angels group Members have been responsible for a large number of the “Cambridge Phenomenon” success stories over recent years. Therefore, in addition to providing funding for early-stage companies, the Cambridge Angels also offer start-ups the considerable benefit of a wide range of expertise, contacts and directly relevant experience in establishing and growing entrepreneurial businesses successfully.

# Cambridge Innovation Capital plc

CIC combines a unique relationship with the University of Cambridge with deep financial and industry links to support rapidly growing intellectual property rich companies in the Cambridge Cluster. The company is committed to building leading businesses from brilliant technologies, with the benefit of some of the most influential figures in the sector and a patient capital structure. CIC is a preferred investor for the University of Cambridge. CIC's unique relationship with Cambridge Enterprise, the commercialisation arm of the University, provides it with exceptional access to University of Cambridge spin-outs.

CIC is predominantly, but not exclusively, focused on building healthcare and technology businesses, combining innovative technology, talented researchers and experienced entrepreneurs. CIC aims to support businesses through to maturity. This is a process which requires patience: technology businesses which grow to a billion-dollar valuation in the UK have, on average, taken over eight years to reach that valuation.

# Clarendon Fund Managers

CLARENDON  
FUND  
MANAGERS

Clarendon Fund Managers is a venture capital fund manager based in Belfast, focused on co-investments with business angel and private investor lead deals. It manages £42.5m of regional VC Funds in Northern Ireland including the £30m Co-Investment Fund and has invested in over 60 companies since it began investing in 2001. As part of the Access to Finance Strategy, Invest Northern Ireland has appointed Clarendon Fund Managers ('CFM') to manage Co-Fund NI. The aim of the Fund is to ensure that businesses with growth aspirations can access equity finance to reach their potential. Further to its successful predecessor, the second Co-Fund NI programme makes available £17.7 million to invest alongside private investors such as business angels or business angel syndicates (hereafter referred to as 'private investors' or 'syndicates') into eligible SME's based in Northern Ireland. When matched 35% with 65% private investors on a deal-by-deal basis this will give an overall 'fund' size of £50 million.

# Downing Ventures

567

Downing Ventures is a division of Downing LLP. Downing Ventures invests venture capital into early and growth stage technology businesses. Downing Ventures' belief is that technology now forms an integral part of the everyday lives of consumers, corporations and governments. Further, Downing Ventures believes that they are now experiencing the benefits of the second wave of technology development, which is now based on sound infrastructure. Investing into this trend, they look for: Visionary entrepreneurs, with the ability to execute as well as dream. Large (potential) addressable markets. Distinct product / service advantages. Limited adoption risk for customers. Downing Ventures seeks to invest 250,000 to 5 million per company. Downing Ventures will invest in seed-stage deals and Series A deals, and then look to continue to support those companies through phases of subsequent growth.

# F-Prime Capital Partners

**F-PRIME**  
CAPITAL PARTNERS

F-Prime's roots are in one of America's great entrepreneurial success stories. Fidelity Investments was founded in 1946 and grew from a single mutual fund into one of the largest asset management firms in the world, with over \$2 trillion in assets under management. For the last forty years, this venture capital group has had the privilege of backing other great entrepreneurs as they built ground-breaking companies in technology and life sciences, including Atari, MCI, ROLM Corp., Alibaba, Ironwood Pharmaceuticals, and Ultragenyx.

Today, F-Prime's funds are larger and more global, but its teams are still small and local. F-Prime stays true to its entrepreneurial roots. In the US and Europe, F-Prime Capital Partners is investing in healthcare (formerly Fidelity Biosciences) and in technology (formerly part of Devonshire Investors). In other geographies, its sister fund is called Eight Roads (formerly Fidelity Growth Partners), with investment teams in London, Shanghai, Beijing, Hong Kong, Tokyo, and Mumbai.

# Fundação de Amparo à Pesquisa do Estado de SP

FAPESP is a public foundation, funded by the taxpayer in the State of São Paulo, with the mission to support research projects in higher education and research institutions, in all fields of knowledge. São Paulo has a population of forty million and generates 35% of Brazil's GNP. The constitution of the State establishes that 1% of all state taxes belong to the foundation and the government transfers these funds monthly. The stability of the funding and the autonomy of the foundation allow for an efficient management of the resources that has had a sizable impact: while São Paulo has 22% of the Brazilian population and 30% of the scientists with a doctorate in the country, the state responds for 52% of the country's scientific articles published in international journals.

The Foundation works in close contact with the scientific community: all proposals are peer reviewed with the help of area panels composed of active researchers. Besides funding research in all fields, the foundation supports large research programs in Biodiversity, Bioenergy, Global Climate Change, and in Neurosciences.

# Global Health Investment Fund (GHIF)

The Global Health Investment Fund (GHIF) is a \$108 million social impact investment fund designed to provide financing to advance the development of drugs, vaccines, diagnostics and other interventions against diseases that disproportionately burden low- and middle-income countries. GHIF supports late-stage innovations for public health challenges such as malaria, pre-eclampsia, cholera, HIV and river blindness, with an emphasis on infectious diseases and maternal/infant health issues that cause significant morbidity and mortality in resource-limited settings. GHIF may also make investments that improve or expand access to existing products—such as developing pediatric formulations of approved therapeutics or improving the stability of widely-used global health vaccines.

As an investment fund with a limited time-horizon, GHIF seeks opportunities that have a high probability of successful commercialization within two or three years. Products with “dual market” potential are of greatest interest; i.e., those that will have a clear impact on public health in developing countries but also have value in high-income countries. High-volume / low-margin products, such as essential vaccines, are also of significant interest.

GHIF employs a range of investment structures including mezzanine debt, convertible debt, preferred equity and project financing with an average investment target of approximately \$10 million per project. Each GHIF project must advance the Fund’s social impact objectives and demonstrate the ability to achieve commercial success.

# Guinness Asset Management

Guinness is independent and focused purely on investment management. Guinness in-house economic, industry and company research allows to take an independent view and not be led by the market. Guinness size and specialist nature also means they have the ability to respond quickly and efficiently to any market movements.

At heart Guinness Asset Management is a value (or growth at reasonable value) investor. Guinness combines strategic sector-selection with a fundamental screening process to identify stock opportunities.

None of their funds are benchmark-constrained, which means they can select stocks without the influence of index weightings. Guinness believes investment managers should have a high conviction about the stocks in their portfolio.

# Hygea VCT

Hygea VCT is an investment company providing investors access to a diversified portfolio of emerging and established MedTech companies. Hygea vct was launched in 2001 as BioScience VCT to invest in bioscience companies, with a particular focus on investing in treatment development companies, based on having Medical Marketing International Group plc (MMI) as the Technology Adviser. After the launch, the financing climate in the UK for treatment development companies became much more hostile. Because of this and the limited size of the fund, the board considered that the emphasis should be on medical technology companies (eg devices, drug delivery systems, diagnostics etc) requiring much less capital than treatment development companies and with the potential to become profitable much more quickly than treatment development companies.

# Maxfield Capital

Maxfield Capital - we help startups go global. We specialize on early stage opportunities that are prepared to tackle global markets.

Our original approach aims at creating global success stories by bridging the gap between high quality engineering and commercial execution.

Some startups face scarcity of technical talent, the others lack business scaling skills or experience challenges of small domestic markets. We help them to bridge these gaps by connecting superb global entrepreneurs with top-notch technical talent. This is a key value-add to our portfolio companies.

Today we prioritize post-PC era technologies that narrow the divide between humans and machines. These technologies have potential to create significant impact in the years to come.

# Mentor Capital

Mentor Capital, Inc. (MNTR) is a public company that invests in medical and social use cannabis companies. Mentor takes a 10% to 100% position in the various members of our family of participating companies, but leaves operating control firmly in the hands of the cannabis company founders. Because adult social use and medical marijuana opportunities often overlap, Mentor Capital participates in the legal recreational marijuana market. However, Mentor's preferred focus is medical and the company seeks to facilitate the application of cannabis to cancer wasting, calming seizures, Parkinson's disease, reducing ocular pressures from glaucoma and blunting chronic pain.

Cannabis related firms seeking a larger amount of long-term cooperative financing, for a smaller slice of their business, are encouraged to contact Mentor Capital to discuss reserving their pro rata portion of Mentor's \$140 million authorized raise.

# Novartis Venture Fund

656

Novartis Venture Fund's primary focus is on the development of novel therapeutics and platforms. Novartis Venture Fund balances the therapeutic focus with investments in medical devices, diagnostics or drug delivery systems. In their investments they look for unmet need and clinical impact, novel proprietary science and understanding of mechanism, management and board experience and capital efficiency in the program.

Novartis Venture Fund prefers to have their initial investment at the early stage to build the company and follow with additional investment in pace with the company's progress. Novartis Venture Fund continues their approach of larger focused investments and anticipate total investments up to USD 30 to 50 mio per company over its life, but it can be as little as 100'000 USD to get started. Novartis Venture Fund will increase their activities to lead or co-lead deals further and remain open to participate in larger syndicates.

# Oxford Technology Management

**oxford**  
technology

Oxford Technology Management was founded by Lucius Cary, and since 1983 has specialised in making and managing investments in start-up and early stage technology-based businesses with high growth prospects.

The OTM team are all scientists or engineers by background, and understanding the technology is the starting point for any investment that we may make.

The Investment policy of Oxford Technology Management is to construct a portfolio of investments with the following characteristics:

- unlisted, UK based, technology businesses
- investments typically in the range of £100,000 - £2,000,000
- in most cases located within easy reach of Oxford to allow a more 'hands on' management strategy

It is expected that approximately half of the funds will be invested in early stage companies (those which have achieved some initial sales) and the balance in start-up companies which are at an earlier stage.

# Pfizer Venture Investments

Pfizer Ventures (PV), the venture capital arm of Pfizer Inc., was founded in 2004 and invests for return in areas of current or future strategic interest to Pfizer. PV seeks to remain at the forefront of life science advances, looking to identify and invest in emerging companies that are developing transformative medicines and technologies that have the potential to enhance Pfizer's pipeline and shape the future of our industry.

With a new \$600M capital commitment from Pfizer for private investments, PV invests in private companies at all stages of development, with a strong focus on early stage opportunities. Other investments, including start-ups and spinouts, will also be considered. We actively work with our current portfolio companies throughout their growth cycles, contributing strategic guidance in addition to our capital and providing access to internal Pfizer expertise, whenever appropriate. While primarily U.S. focused, international investments may represent up to 20% of the portfolio. We have the ability to lead or join a syndicate of investors and will seek board representation commensurate with our investment.

# Rewired

Launched in summer 2017, Rewired is a deep-tech fund, investing in applied science and technologies that advance machine perception.

Rewired is an AI & Robotics investment vehicle backed by a private family office. We principally invest in applied science and technologies that advance machine perception.

We believe that improving sensory capabilities will unlock the next-generation of smart robotics. To start, the group has committed \$100 million to help develop technologies that enable robots to cope in the real world, make good decisions in real time, and help humans do more with less. We think that robotics should seamlessly complement humanity, not replace it.

# Roche Venture Fund

The Roche Venture Fund is the name given to the corporate venture fund of the healthcare company Roche. Roche has allocated CHF 500 million to invest in and develop commercially successful innovative life science companies.

Roche has been investing in early stage companies as part of collaborations since the early-1990s and independent of collaborations since 2002. All equity investments made by Roche in biotech and diagnostics companies (including collaboration investments) are negotiated and managed by the Roche Venture Fund. In the past 20 years, the Roche Venture Fund has invested in over 60 companies globally. Currently, Roche Venture Fund has a portfolio of around 30 companies located in 10 countries across Europe, North America and the Pacific Region. The fund is an evergreen fund with CHF 500 million available of which approximately 40% is currently invested.

The Roche Venture Fund is a committed long-term stable investor with sufficient money reserved in their fund for follow-on financing rounds. As part of a multinational healthcare company, the Roche Venture Fund has access to considerable expertise both internally and externally.

# Takeda Ventures

TVI's mission is to identify, help create and support the development of therapeutic innovation that aligns with Takeda's own strategic imperatives. They do this by investing in technology and product concepts, and highly effective teams that can turn ideas into reality. Their primary focus is on medium to longer term returns in the form of product and technology successes for their portfolio companies and capital gains for the financial institutions they work with. As a Pharma strategic investor, TVI aims to provide support and guidance to entrepreneurs and early-stage companies driving concepts from preclinical through clinical proof of concept. They also strive to forge active, collaborative interactions that result in synergies with Takeda's considerable R&D resources.

TVI is based in Palo Alto, California and is actively seeking global investment opportunities. Their goal is to build a portfolio of strategic investments, with an immediate emphasis on cardiometabolic, central nervous system, chronic inflammatory and immune modulation, and oncology therapeutic domains. Their focus also includes new platforms for drug target and biomarker identification, regenerative medicines, innovative vaccines technologies and delivery systems for novel protein and peptide therapeutics.

# University of Birmingham

Birmingham has been challenging and developing great minds for more than a century. Characterised by a tradition of innovation, research at the University has broken new ground, pushed forward the boundaries of knowledge and made an impact on people's lives.

We continue this tradition today and have ambitions for a future that will embed our work and recognition of the Birmingham name on the international stage.

Universities are never complete. They develop as new challenges and opportunities occur. At Birmingham we innovate, we push the frontiers of understanding; we ask new research questions, we turn theory through experiment into practice – because that's what great universities do.

# University of Oxford

Oxford is a collegiate university, consisting of the central University and colleges. The central University is composed of academic departments and research centres, administrative departments, libraries and museums. The 38 colleges are self-governing and financially independent institutions, which are related to the central University in a federal system. There are also six permanent private halls, which were founded by different Christian denominations and which still retain their Christian character.

The collegiate system is at the heart of the University's success, giving students and academics the benefits of belonging both to a large, internationally renowned institution and to a small, interdisciplinary academic community. It brings together leading academics and students across subjects and year groups and from different cultures and countries, helping to foster the intense interdisciplinary approach that inspires much of the outstanding research, achievement of the University and makes Oxford a leader in so many fields.
