11 Media and Publicity Influencers

14 Investors and Donors

24 Entrepreneurs

40 Research and Academia Professionals

11 Politics, Policy and Governance

Sector Classification and Global Distribution of Longevity Leaders

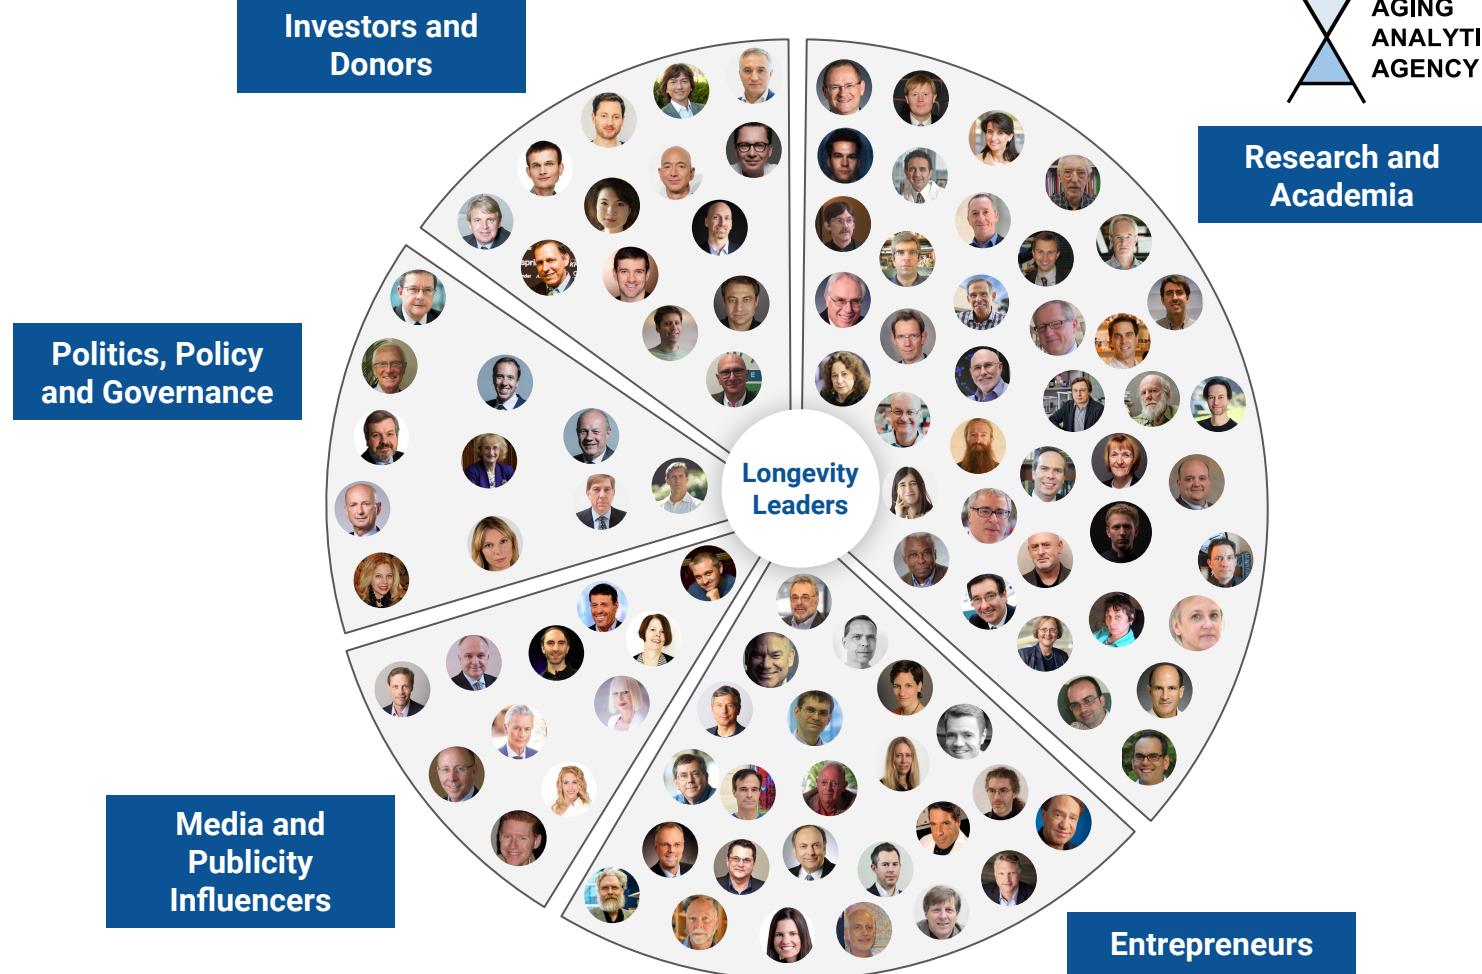

In order to understand where the sources of influence lie, and how to build efficient interdisciplinary teams able to deliver meaningful milestones on the road to a fully developed global Longevity Industry, it is crucial to analyze the existing examples of accomplished leaders in this area, as well as their backgrounds, technical skill-sets, strengths, competencies, official roles, and the types of impact that they have on the Longevity sphere in general.

The Longevity Industry is emerging at the intersection of various disciplines. The market is extremely dynamic, and its trends should be investigated as quickly as possible. The Top-100 Longevity Leaders list includes experts who have made various types of contributions towards advancing Longevity in politics, media, industry and scientific research. 40% of all participants are primarily involved in research-related activities, while 38% are directly involved in entrepreneurship, and another 22% are involved with political and media engagement.

Conclusions Reached from the Distribution of Longevity Leadership

It is apparent that the next roadblock in the further development of the global Longevity Industry will be surpassed only if the largest institutions active in the domains of politics, science, and finance jointly recognise Healthy Longevity as a substantial opportunity and a solution to existing challenges, and pull together in the same direction. Longevity has already achieved mainstream recognition and growth in the areas of media, science, and industry. Government - and the development of tangible national development strategies that emphasize healthspan extension and the paradigm shift from treatment to prevention represents the next great frontier for the topic of Longevity. Progress in biomedicine already has the global talent, resources, and discipline it needs to continue to grow. Therefore, the next major effort in growing the Longevity sphere should be ensuring that the diverse forms of leadership described in this document continue work in each other's favor, with an ongoing increase in government involvement, to execute the transformation of the problem of ageing into the opportunity of Healthy Longevity.
