

AgeTech UK Analytics IT-Platform

*Companies, Investors, Funding Bodies
R&D Centres, Influencers, Scientists, Technologists*

AgeTech UK Analytics IT Platform: Full-Scope Interactive Database of AgeTech Companies, Investors, R&D Centres, Funding Bodies and Influencers in the UK

- Aging Analytics Agency's upcoming **AgeTech UK Analytics IT-Platform** aims to serve as the most comprehensive interactive database of Companies, Investors, R&D Hubs, Funding Bodies and Influencers in the UK AgeTech Ecosystem made to date, profiling and visualizing connections between 1200+ entities applying advanced technology to the challenge and opportunity of the UK's ageing population.
- The interactive digital analytics platform, developed by [Aging Analytics Agency](#) in partnership with the [Biogerontology Research Foundation](#), will be released in early August 2020, and encompasses the full scope of technologies, innovations and practical applications within the UK AgeTech sphere, classifying its constituent companies into 17 distinct industry subsectors including TeleCare, TeleHealth, Tech-enabled Care, Tech-enabled Home Care, Financial Independence, Sensory Aids, NeuroTech, SleepTech, Social and Communication Technologies, Mobility Tech, Delivery Tech, Smart Homes, Living Communities, Wellness & Fitness, Fall Prevention & Detection, Biomedicine and COVID-19.
- The project was developed using the sophisticated IT-solutions and [Interactive MindMap and Data Visualization](#) capabilities of [Deep Knowledge Group](#), powered by the analytical industry-specific insights and knowledge of Aging Analytics Agency and its institutional collaborator, the Biogerontology Research Foundation..
- It will be released free-of-charge in an open-source manner for the benefit of all UK citizens, in order to maximize its potential humanitarian benefit in terms of optimizing and harmonizing the rapid development and translation of AgeTech tools and solutions to some of the nation's most pressing age-related challenges and opportunities with maximum social impact and inclusivity.
- The platform's developers are open to discussions with select institutions interested in becoming partners of the platform, and in assisting with broad dissemination and promotion of the first iteration of the platform, government and stakeholder engagement and the development of its second enhanced iteration.

AgeTech UK Analytics IT-Platform Highlights

500
Companies

600
Investors

100
Funding Bodies

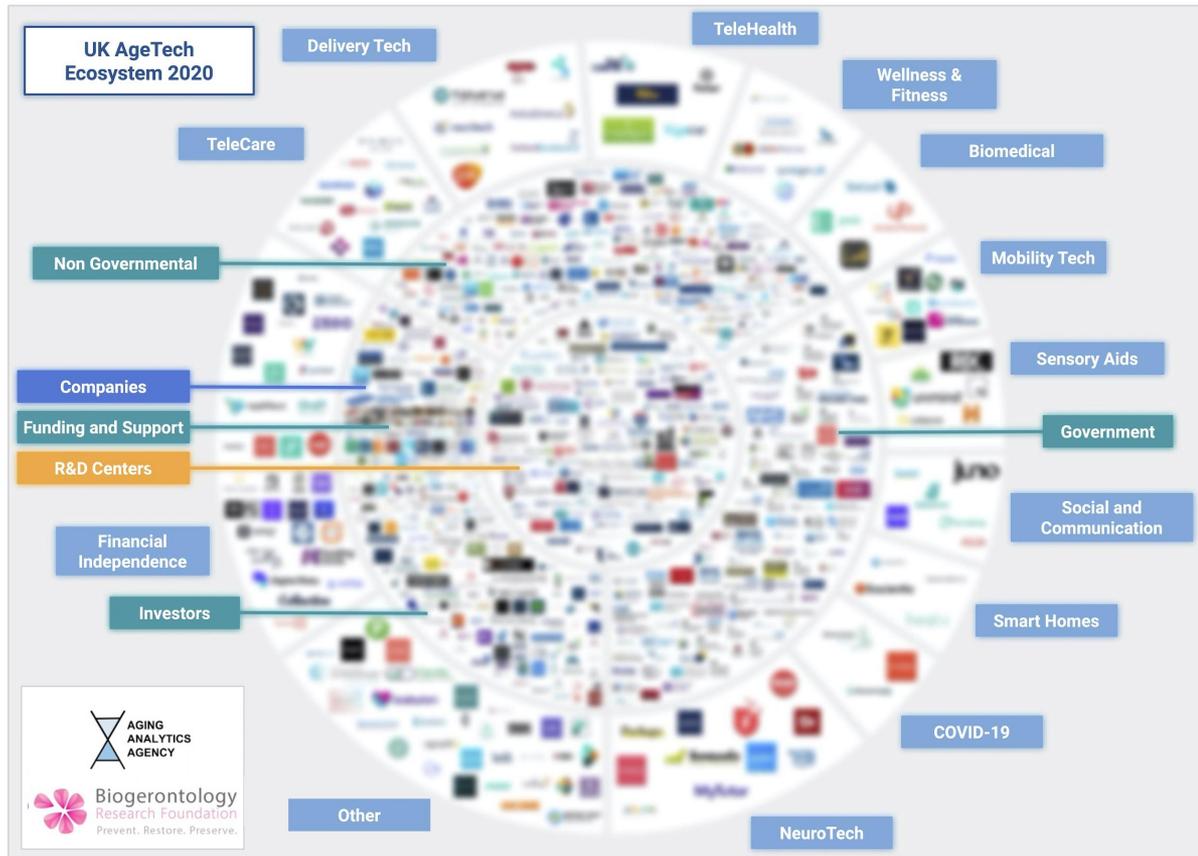

75
R&D Centres

100
Influencers

1200+
Total Entities

- The IT-Platform is in a continuous state of development, and following its public launch in August 2020 its developers intend to on an ongoing basis its breadth and depth, the scale and scope of its scientific and technological sectors, the number of specific regions it covers, and the overall quantity of entities that it profiles and visualizes.
- In the longer term the platform is intended to serve as a distributed knowledge system, crowdsourcing additional data from relevant experts. Aging Analytics Agency and its collaborators have already aggregated data from multiple reputable public sources and qualified experts, but remains open to further contributions from industry stakeholders, experts and specialists.
- Aging Analytics Agency and the Biogerontology Research Foundation will also be further developing the platform into an enhanced and extended second-phase analytical dashboard featuring additional functionalities including company and technology-focused market-readiness and social impact rankings, entity smart-matching and extensive filter and search functions, allowing responsible decision makers to use the platform to derive action-based answers and insights to key questions at the heart of national strategic decision making to maximize the inclusive social impact of the nation's AgeTech industry and ecosystem for all UK citizens.

Sophisticated Analytics Tool for Optimizing AgeTech Industry Development

The ultimate aim of the platform is to serve as an actionable tool to allow UK strategic decision makers, government departments and representatives, and both government and non-governmental funding bodies to acquire a more realistic and actionable understanding of the true breadth and depth of the UK AgeTech ecosystem, and to serve as an efficient tool to optimize strategic decision making, funding allocation, technology translation and industry development, maximizing social impact and leveraging the massive volume of existing AgeTech tools and solutions at the UK's disposal to alleviate many pressing challenges and concerns of national importance.

AgeTech Offers Market-Ready Solutions to Issues of Critical National Importance

- Visualizes Entire UK AgeTech Ecosystem
- Individual Profiles of 1500+ Entities
- Interactive Connection Lines Between Entities
- Comprehensive Industry Subsector Segmentation

The platform will be released free-of-charge in August 2020 in an open-source manner for the benefit of all UK citizens, in order to maximize its potential humanitarian benefit, and its capacity to help strategic decision makers in optimizing and harmonizing the rapid development and practical implementation of AgeTech tools and solutions to some of the nation's most pressing age-related challenges and opportunities with maximum social impact and inclusivity.

Platform Functionality: Interactive Mindmaps and Dynamic Profiles

- Interactive mindmaps are sophisticated tools for visualizing market segmentation and connections between AgeTech Industry entities and stakeholders, particularly companies, investors, personalities, government organizations, non-profits and R&D Hubs.
- Additionally, the mindmaps feature dynamic connection lines allowing users to visualize different types of relationships between entities, including financing and collaborations.
- The mindmaps are divided into layers, or sectors, and sectors are segregated into groups. Clicking on a specific sector highlights just the entities grouped into that specific industry segment.
- Aging Analytics Agency's interactive mindmaps and IT-Platforms are a unique and major hallmark of their brand, and one of the main factors that has established them as the leader of sophisticated, quantitative and multidimensional Longevity Industry analytics.

Analytical Precedents: Deep Knowledge Group's Global and UK COVID-19 MedTech Ecosystem IT-Platforms

The technology, software solutions and overall architecture of the platform was based modelled after the [UK COVID-19 MedTech Analytics IT-Platform](#) (another recent industry-specific IT-Platform released in June 2020 by Aging Analytics Agency's parent company, the DeepTech-focused international consortium Deep Knowledge Group), as well as its sister platform, the [Global COVID-19 MedTech Analytics IT-Platform](#), which together profile the full scope of the international and UK-specific COVID-19 MedTech landscape from science to technology, R&D, treatment, diagnostic and vaccine development, and practical applications occurring globally.

In addition to compiling and visualizing data on the full scope of the UK AgeTech Ecosystem, the upcoming platform also places particular emphasis on AgeTech solutions that can help protect and treat COVID-19 in the UK's elderly population, including COVID-19 as a specific industry subsector, and highlighting significant intersections between the distinct national challenges of ageing population and the coronavirus pandemic.

These platforms and other recent Deep Knowledge Group's COVID-19 Analytics, have received widespread media coverage and notable government acknowledgements since their release, including [Alain Berset, Former President of Switzerland](#), several [Israeli embassies](#), the [Saudi Arabian Ministry of Media](#), the [Official Georgian Government Office and Ministry of Foreign Affairs](#), and [many others](#)).

About Aging Analytics Agency

[Aging Analytics Agency](#) is the main source of data and analytics for the UK-based **All-Party Parliamentary Group for Longevity**, an official member organization of the **United Nations NGO Committee on Ageing**, and regularly and systematically submits policy and strategy proposals to the **World Health Organization**, **World Economic Forum**, the **UK House of Lords** and other Longevity policy and governance organizations. It is the only specialized analytics agency in the world that focuses exclusively on the emerging Longevity Industry. They are recognized internationally as the premier analytics agency for advanced data analysis, industry reports and next-generation infographics on the topics of Aging and Longevity. *Now in its 5th year, Aging Analytics Agency has been on the frontlines of Longevity Analytics since the inception of the industry.*
