

## About Extraterrestrial Institute

**Extraterrestrial Institute** is a specialized think tank in the area of extraterrestrial activity R&D profiling, business intelligence, and innovation analytics. The company is dedicated to producing powerful data mining and visualization systems; interactive analytics tools; and industry reports offering deep data-driven insights, business intelligence, and strategic guidance in the high-growth and significant opportunity areas of the extraterrestrial activity research.

### "UAP Activity Analytical Case Study 2023"

This is the second iteration of the SpaceTech Analytics report on the UAP recognition, produced by Extraterrestrial Institute. With the first report built on the US "Preliminary Assessment: Unidentified Aerial Phenomena," the second one is an advanced version of the previous ones with enhanced analytics, supporting IT-platform, and an overview of UAP activity markers and both government and scientific worlds' responses on the boldest question raised by humans regarding life beyond Earth.

#### Some of the key takeaways from the report include:

- Recent years have witnessed a shift in attitudes towards UAPs, with a growing acceptance of their potential reality. High-profile sightings and better video evidence have contributed to this change, alongside the acknowledgment of UAP existence by the U.S. government and their investigation of the phenomenon.
- David Grusch, a former U.S. military intelligence officer, has made public claims about a highly secretive UFO recovery program maintained by the U.S. federal government.
- The historical UFO cases have spurred societal discussions on the possibility of extraterrestrial life and the existence of advanced technology beyond our current understanding.
- The historical UFO cases have spurred societal discussions on the possibility of extraterrestrial life and the existence of advanced technology beyond our current understanding. In this situation, the importance of the UAP Recognition and Analysis is growing rapidly. It is clear that data gathering and analysis, creation of the relevant policies, optimization of the existing technologies and future role of the UAP at the economical level require adequate means, which could be only provided by the global UAP/UFO research efforts.

## UAP Activity Analytical Case Study

Overview 2023

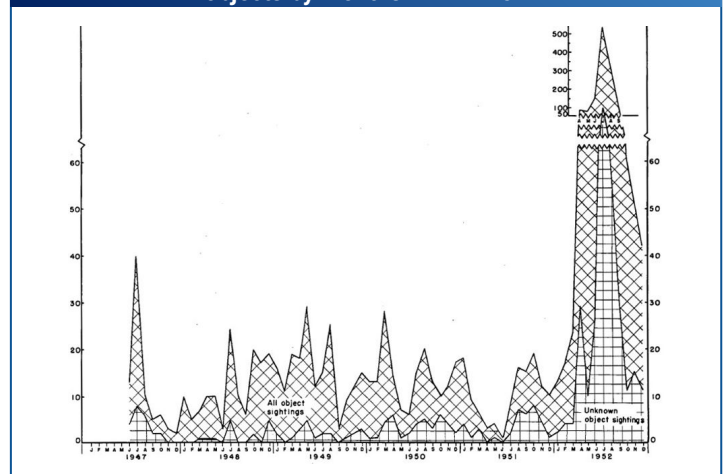

[www.extraterrestrial.institute](http://www.extraterrestrial.institute)

This report distinguishes fact from fiction in humanity's pursuit of understanding unidentified aerial phenomena by consolidating discoveries, trends, and advancements to establish a comprehensive framework, propelling innovative research. While conclusive evidence of alien life remains elusive, the Extraterrestrial Institute's continually enhanced analytical system transforms into a robust big data tool, enabling comprehension of the UAP realm and necessitating policy and technological considerations. The Extraterrestrial Institute promotes global collaboration on unidentified aerial phenomena and knowledge-sharing.

### 90,000 UFO sightings combined into one map

### The frequency of reports of UFO sightings and the number of objects by months 1947-1952

## Study of Extraterrestrial Activity Framework

### Earth-based Ecosystem Participants

- UAP Researchers
- UAP Enthusiastic Communities
- Investigative Organizations
- Scientific Institutions
- Government Agencies
- Aviation Experts
- Forensic Analysts

### Unidentified Flying Objects Study

- UFO Sightings and Reports
- Anomalous Aerial Phenomena
- UFO Investigations
- Historical UFO Cases
- UFO Reporting Hotlines

### UAP-Tracking Facilities

- Space Agencies
- Deep Space Telescopes
- Satellite Networks
- Space Surveillance Networks
- SETI Projects

World Map of Single or Group Sightings

This map represents the density of UAP single or group sightings throughout the world. According to the statistics, the most frequent sightings are occurred in the USA and Western and Central Europe, which are considered to be the most developed parts of the world.
