Event Description:

The event will bring together policy-makers, government officials and field experts all over the world to share their experiences and insights learnt from the pandemic. Also, the expansion of E-government and GovTech tools usage will be considered for the Post-pandemic world. Lastly, the further course of global fight against coronavirus and the necessary steps we have taken into consideration at this point will be discussed. During this open-access event influencers of the GovTech Industry will discuss new horizons of the market.

Moderator: Carl El-Khoueiri
