Three Pillars of Swiss Longevity Valley

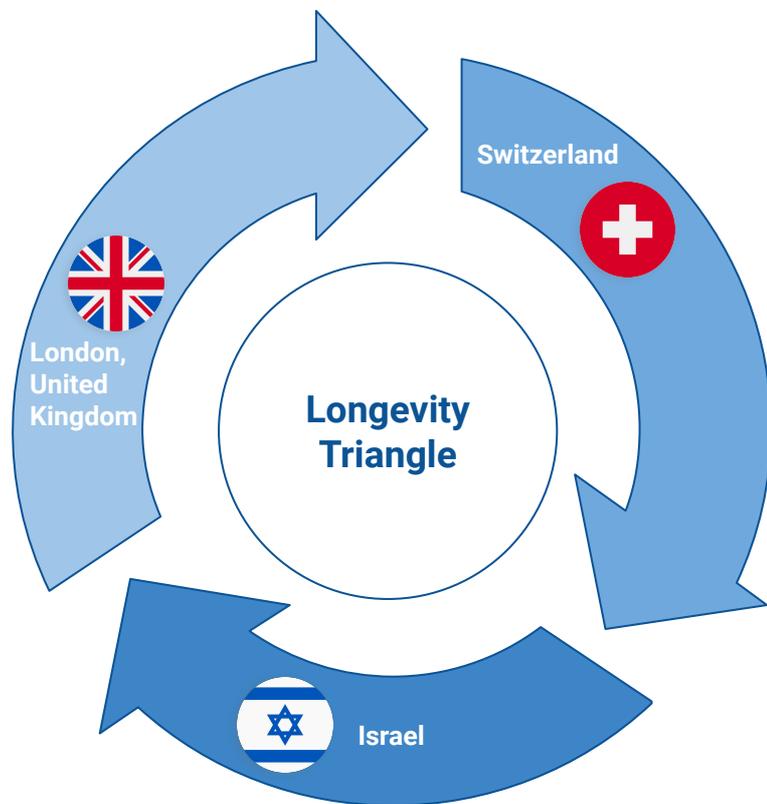

Every industry needs an innovative out-of-border approach that can be accelerated by the intense research & development sector. Close collaboration between academic and industrial representatives of the BioTech community may create an auspicious ecosystem. In such an environment, high-tech startups rise, attracting new investments and talents, daring to find solutions to the most difficult aging-related issues of modernity.

The main objective of Longevity Financial Hub is to develop strong global connections and focus on the needs of the economy and serve as an international financial platform for particular regions and the global economy in general. Progressive companies based in Longevity Financial Hubs will develop new business models using AI to improve analytics quality.

Additional efforts are needed to further maintain and develop the industry's existing strengths. Aging proliferation as a growing problem is turning into an opportunity for governments to develop progressive policies for the pension system, an ecosystem of insurance companies, and a national strategy for intensive healthcare system development.

Longevity Triangle

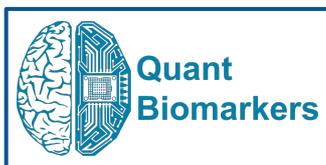

The United Kingdom, Israel, and Switzerland have some of the most developed economies and healthcare systems.

Switzerland is the initial virtual capital of Longevity Valley. It is the perfect place where advanced technologies and developed financial bases meet.

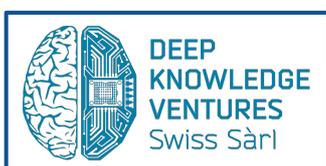

London has great potential and a vast financial base to develop a Longevity Industry. On the other hand, **Israel** has a proficient technological base and many developments in the Longevity field. In the future, the nations developing advanced technologies rapidly and need to implement longevity governmental initiatives could become part of the **Swiss Longevity Valley**.

Deep Knowledge Group is a consortium of commercial and non-profit organisations active on many fronts in the realm of DeepTech and Frontier Technologies (AI, Longevity, FinTech, GovTech, InvestTech), ranging from scientific research to investment, entrepreneurship, analytics, media, philanthropy and more. All of its activities (from for-profit to non-profit) are structured in order to support, develop and leverage the power of DeepTech for socially-inclusive humanitarian benefit, based on the foundational principle that technological innovation is the key driver and most efficient tool for improving quality of life, safety, stability and growth potentials for global society.

Quant Biomarkers, Basel is a data science-driven financial and biotechnology company, specialised in quantitative assessment of the biomarkers of human longevity and their implementation for investment, insurance and research objectives. The main goal of the company is to introduce biomarkers-driven longevity risks mitigation for a broad group of financial and healthcare-related entities. Founded in November 2021, with headquarters in Basel, Switzerland and branches in United Kingdom, Germany and Ukraine.

Deep Knowledge Ventures Swiss Sàrl, Geneva is a Swiss based subsidiary of Deep Knowledge Group devoted to the financial, analytics and philanthropic activities in the Swiss region.

Longevity International Association, Geneva is an open-access non-profit decentralised Longevity Industry Knowledge and Collaboration platform with the aim of promoting a greater degree of synergy, efficient cooperation, and discussion among a variety of Longevity Industry participants and stakeholders, including companies, investors, non-profits, academic labs and R&D hubs, governmental bodies and policy makers.
