## About Aging Analytics Agency

Aging Analytics Agency is the world's premier provider of industry analytics on the topics of Longevity, Precision Preventive Medicine and Economics of Aging, and the convergence of technologies such as AI, Blockchain, Digital Health, and their impact on healthcare industry.

## Our Value Proposition:

### Open Access and Proprietary Analytical Case Studies

Aging Analytics Agency is producing regular open-access reports covering emerging longevity markets – technologies, innovations, companies, and trends. Our clients and partners can enjoy access to proprietary reports featuring additional in-depth research conducted by our team on a regular basis.

### IT-Platform and Big Data Analytics Dashboard

Our company is building a sophisticated cloud-based engine for advanced market and business intelligence in the longevity biotech, medicine, finance, and governance industries. It includes a data mining engine, infrastructure for expert data curation, and advanced visualization dashboards, including mindmaps, knowledge graphs, and 3-dimensional visualizations.

### Strategic Consulting

Aging Analytics Agency offers a comprehensive range of consulting services, conducting customized case studies, research, and analytics for internal (organizational) use, tailored to the precise needs of specific clients. It includes a wide range of market and competitor research services, technology scouting and due diligence, investment landscape profiling, and comprehensive analytics support for decision-making.

## Key Takeaways

- **Autonomous stem cells for face skin rejuvenation** (intra-dermal injections) help fight the very causes of aging with **significant effect after 7-12 months**.
- The **microbiome of the body** helps to strengthen the immune defense of the human epidermis and improves the skin.
- The **microbiome of the face** and products with bacteriophages allow removing pathogenic bacteria from the skin microflora point-wise.
- In **30-40% of cases**, the flora of the oral cavity becomes the cause of aspiration pneumonia and lung abscesses. Therefore, **oral hygiene**, using probiotics and plant extracts **will help normalize** the oral microbiota composition.
- **Apparatus cosmetology** technologies designed to solve problems with **weight optimization and obesity** are becoming increasingly.
- The most promising **cosmetological procedures for body muscles** help to combat excess weight.
- **Follicular unit extraction (FUE) and intense pulsed light method (ILP)** are the most popular cosmetics surgery procedures.
- **Dietary Supplements and Nutricosmetics** cause rapid skin renewal, accelerate nail growth **by 12%**, and **reduce fragility by 42%**.
- **Advanced Procedures** are vital as they can safely help **stimulate hormesis** - an adaptive response of the body to low doses of harmful factors, which helps our body becomes more resistant to stress and heal itself at the cellular level.
