The Asia Digital Ecosystem Big Data Analytics Dashboard is robust and data-driven, designed to provide users with a comprehensive and customizable view of statistics related to Asia Digital Ecosystem companies and funding rounds.

Continuously updating its vast databases with patents, scientific articles, and research data from leading sources globally, the platform guarantees the information provided is up-to-date and in sync with industry progressions. Its user-friendly interface and customizable analysis tools enable users to explore the complex landscape of philanthropy, make data-driven decisions, and gain valuable insights into the sector.

Market Intelligence System and AI-driven Big Data Analytical Dashboard*

About Deep Knowledge Group

Deep Knowledge Group is a consortium of commercial and non-profit organisations active on multiple fronts in the realm of DeepTech and Frontier Technologies (AI, Longevity, FinTech, GovTech, InvestTech), ranging from scientific research to investment, entrepreneurship, analytics, media, philanthropy and more.

Deep Knowledge Group runs several data-driven **investments and financial vehicles**

DEEP KNOWLEDGE VENTURES LONGEVITY CAPITAL Longevity Financial Advisors LONGEVITY CARD

The Solution – AI-driven Big Data Analytical Dashboard

By combining Deep Knowledge Analytics' **robust data modeling, visualization, and interactivity** with its' **unparalleled market expertise, sophisticated multi-dimensional analytical frameworks and algorithmic methods**, the **Asia Digital Ecosystem Dashboard** can deliver sophisticated market intelligence, make pragmatic forecasting, and do industry benchmarking. To achieve this, it uses multiple specially-designed and specifically-weighted metrics and parameters. By **reporting and monitoring developments in the technological and industrial ecosystems** of the Asia Digital Ecosystem, it ensures that the collected data is accurate, up-to-date and available 24/7. Using state-of-the-art data analytics and 3D visualization tools, the Dashboard analyzes **market insights, trends, and statistics** to quickly and efficiently extract the necessary information and provide actionable answers.

AI Engine of Big Data Analytical Dashboard: Data Science behind the IT Product

Note: below, we describe the toolkit that we implement in other Deep Knowledge Group's projects and will use to build this Tailor-Made Market Intelligence System

Market Intelligence System and AI-driven Analytical Dashboard IT Architecture

Major Components of Data Science and AI Engine Architecture

Data Aggregation

Big Data Analytics System and Dashboard cover the datasets synthesized from various sources and having the different types of representation

Database Extension

The data sets behind the finalised data provided to users is subject to constant updating to ensure the precise results of analysis

Natural Language Processing (NLP) Engine

Advanced NLP-techniques are used for gathering and storing the multiparametric and high-dimensional data.

Components of Data Science and AI Engine

AI-Based Clustering

Embedded AI engine is able to find the interconnections and form the groups of entities having the similar characteristics

Companies Assessment with Machine Learning

Dashboards provide the ranking of both private and public companies based on the aggregated and constantly refreshed market data

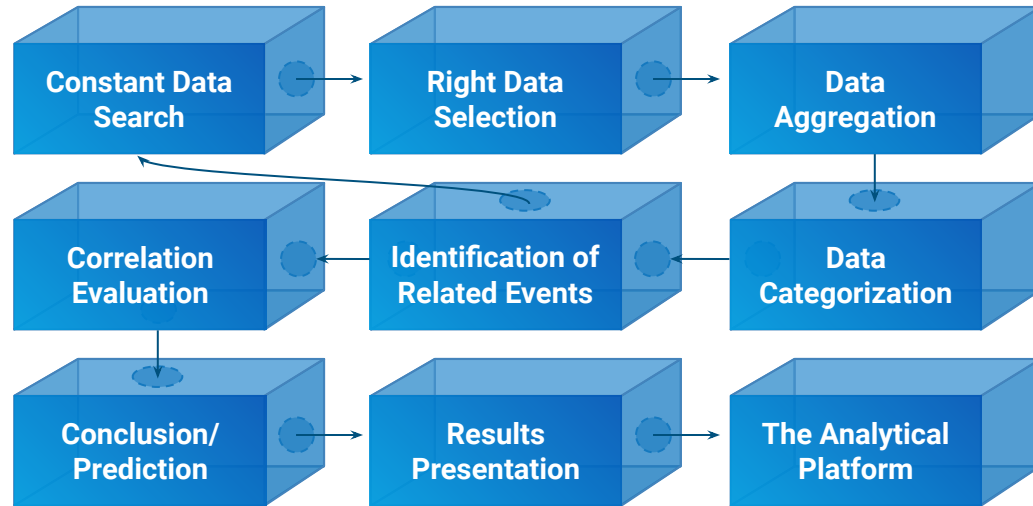

AI-based Predictions

Big Data Analytics System and Dashboard has the modules able to forecast the possible ways of future traction of certain events (such as stock prices) based on the large sets of market data

Natural Language Processing (NLP) Engine

Natural Language Processing will play one of the most important roles in the technology pipeline of the platform. Such approaches are able to give the right means for working with mixed data types, as well as process large amount of data in an automated way. Given the pain points the platform is designed to alleviate, this machine learning approach is going to provide a substantial technological support to the platform performance.

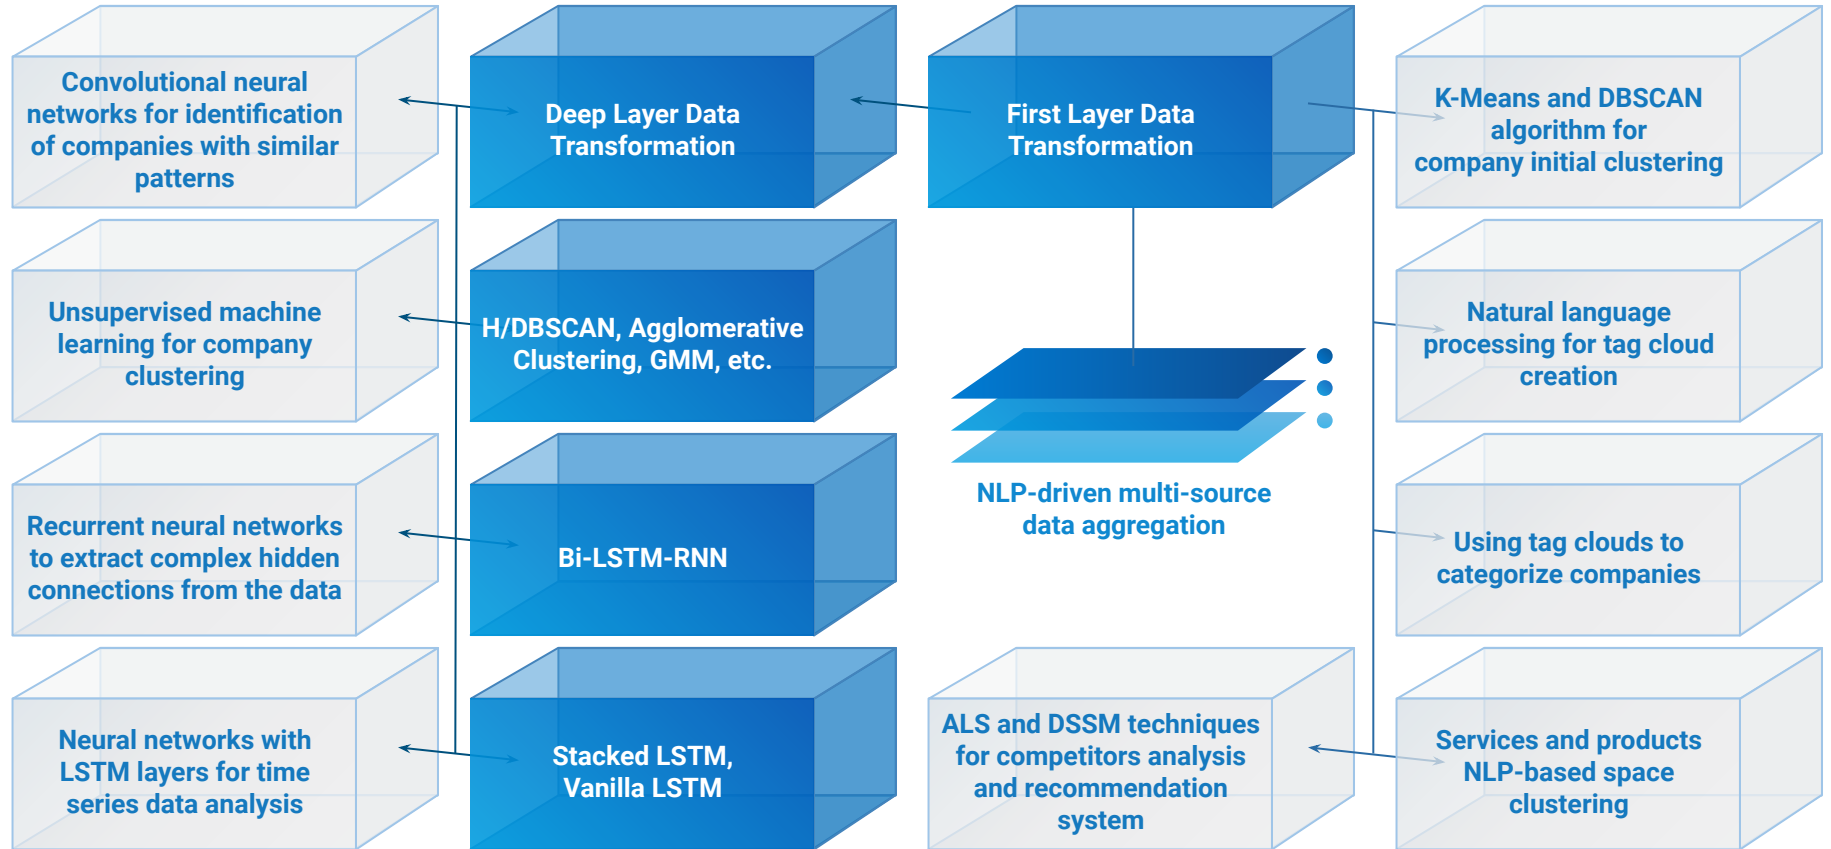

Dashboards' NLP Working Scheme

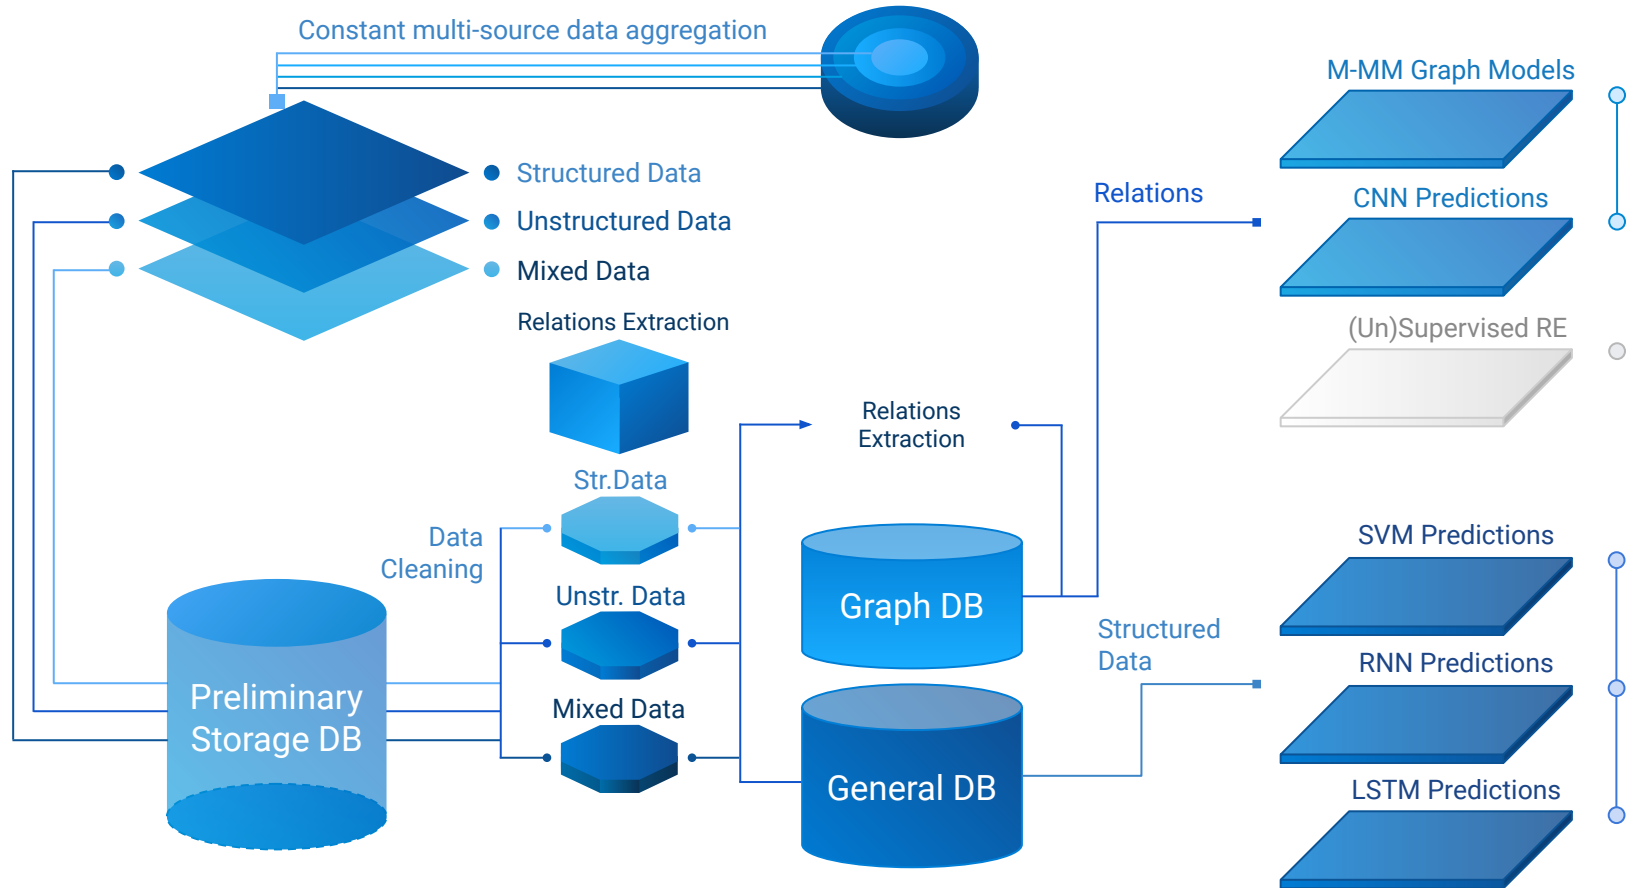

Main Applications for Dashboards

Data Aggregation	Search and extraction of "marked" information
Data Classification and Sorting	Processing and distribution of extracted information
Data Update	Constant updating of information and search for "similar" events
Search for Correlation	Calculation of correlation between "events"
Prediction	Computing of a correlation-based prediction

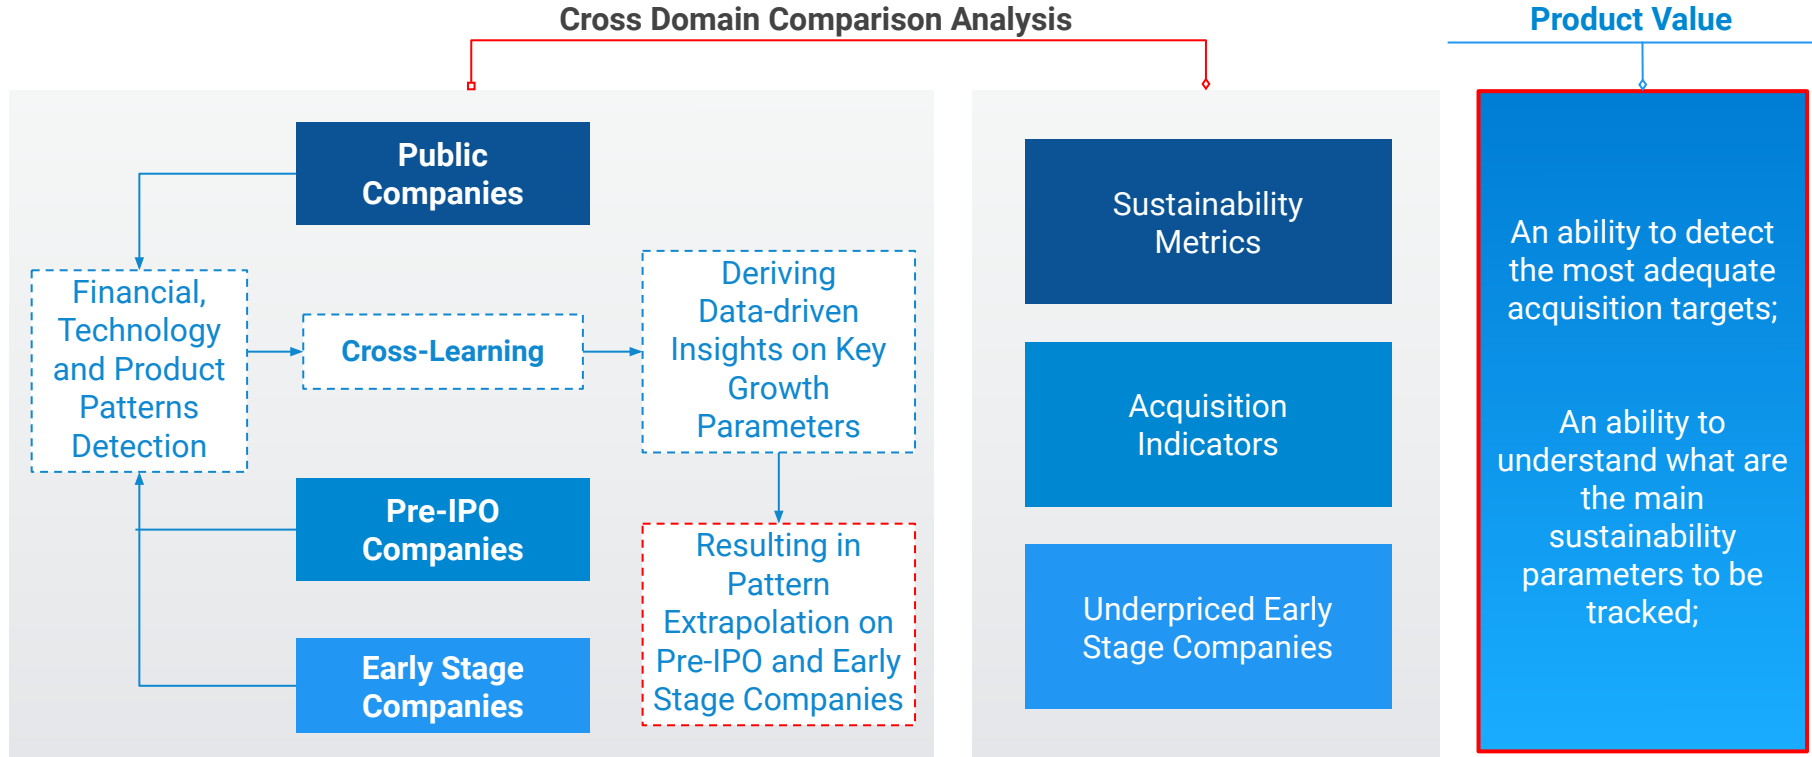

Machine Learning Approaches for Company Assessment

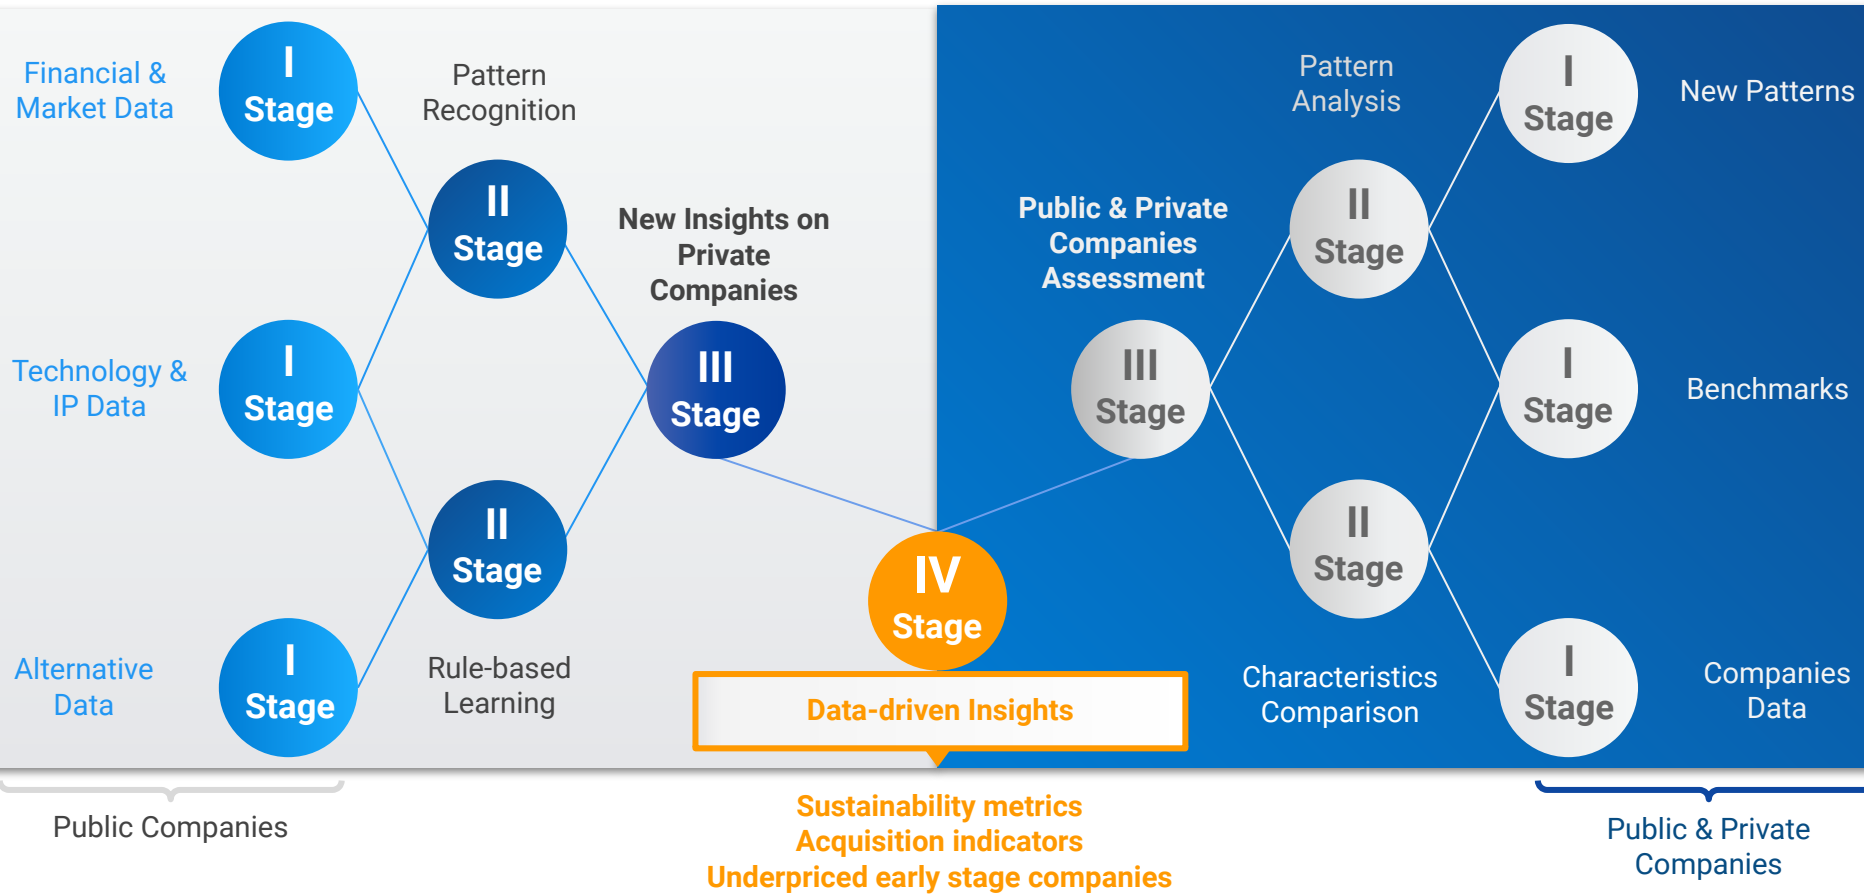

AI General Pipeline

Deriving Value from the Data Scarcity

Overcoming Data Disproportion via the Pattern Learning

Accurate Data Science-Based Company Assessment

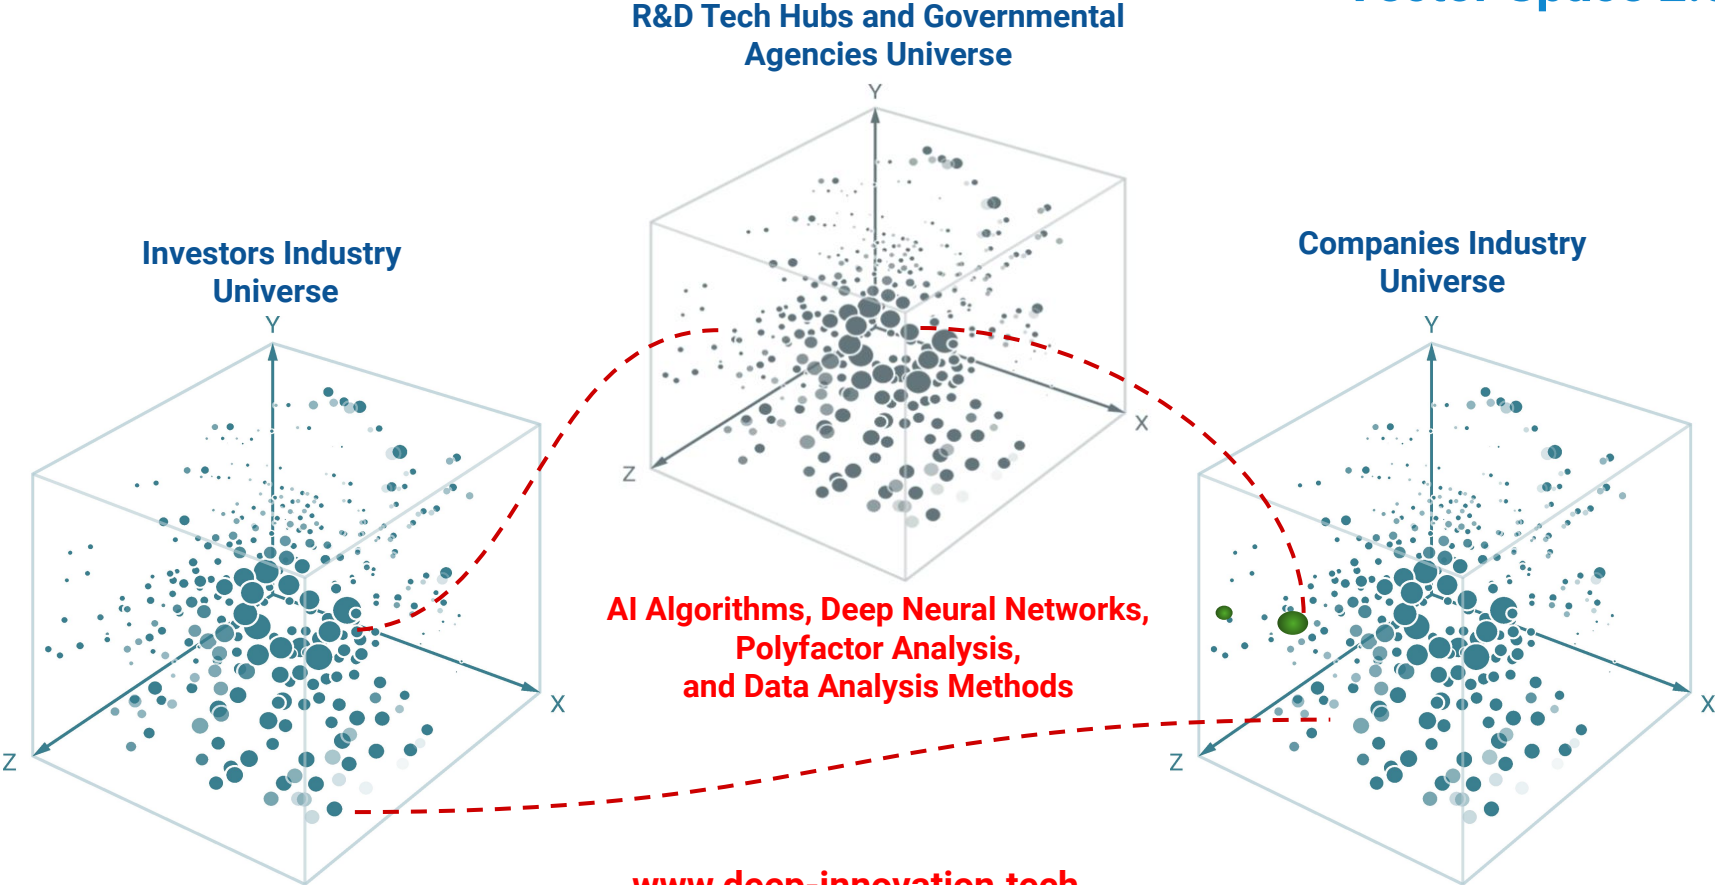

Life-Sciences Companies

Advanced Visualization of Industry Ecosystem (Mindmaps)

Key Features

UK Artificial Intelligence Industry Landscape

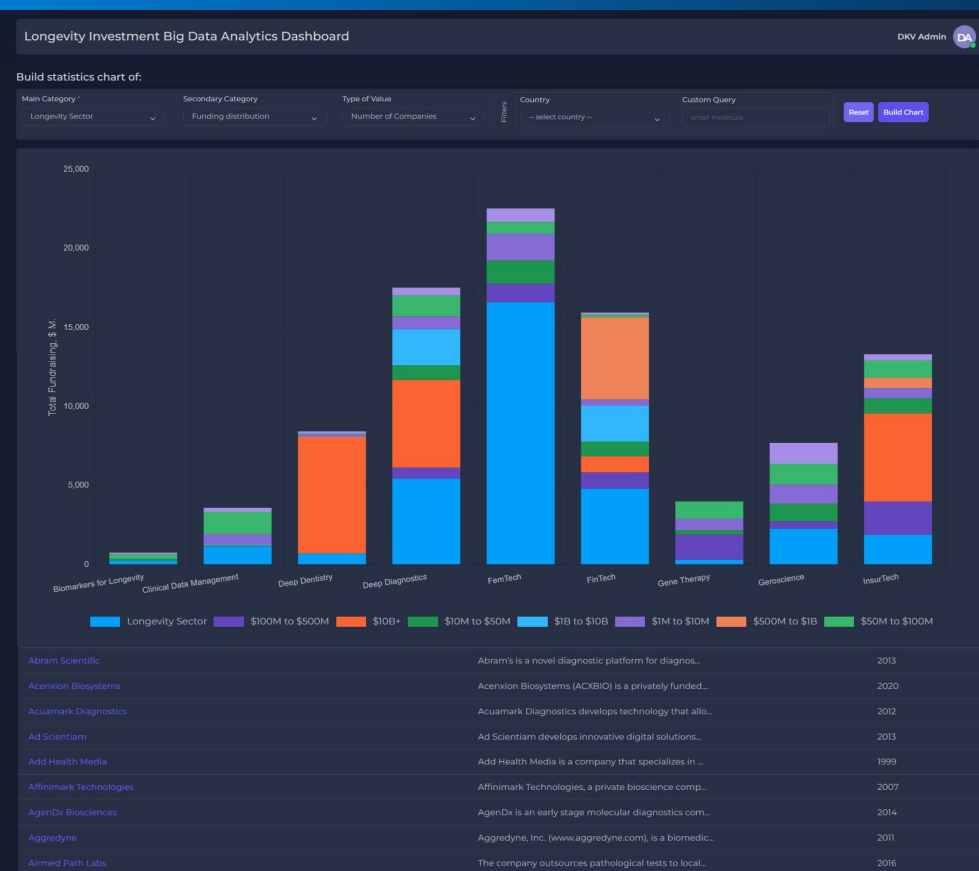

Mindmaps allow users to demystify the complexity of the markets by visualizing the connections between the market players. Mindmaps provide the right means to conduct more efficient business development, finding new allocation targets, co-investors and competitors.

- Big Data Design
- 30+ Covered Markets
- 100+ Analysed Sectors
- 50000+ Represented Entities
- 5+ Entities Layers Types
- Interactive Linkage Between Entities

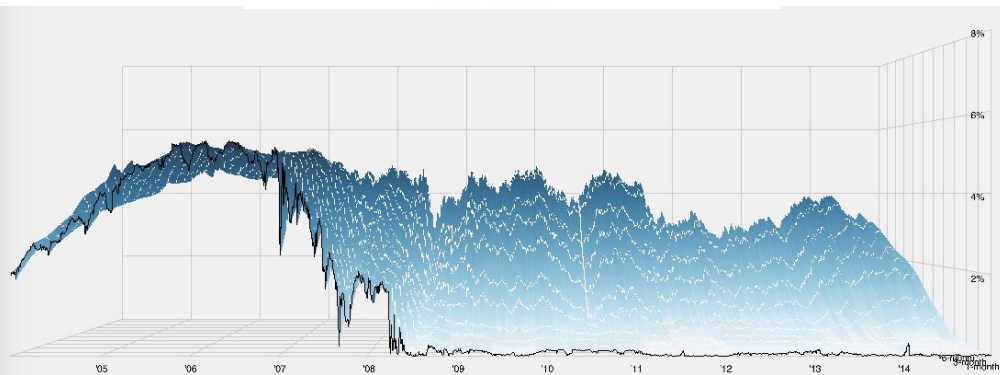

Advanced Visualization. Interactive Chart Builder

Key Features

- Interactive market coverage
- Custom queries for maximum personalization of industry outlook
- 50,000+ represented entities
- 5+ entity layers types

Advanced Visualisation. Three.Js Implementation for Diagrams Constructor

Key Features

P

Personalized approach for data visualization

L

Less time – more results. Achieve your goals with a low-code solution

A

All features and visualization approaches in one place

Y

Your vision = our solution. Analyse, present and pitch without limits

Advanced Visualization. Dashboards Constructor

Key Features

E

Enables the creation of tailored and personalized analytical dashboards in a matter of minutes

A

All features that are available on other dashboards are already enabled

S

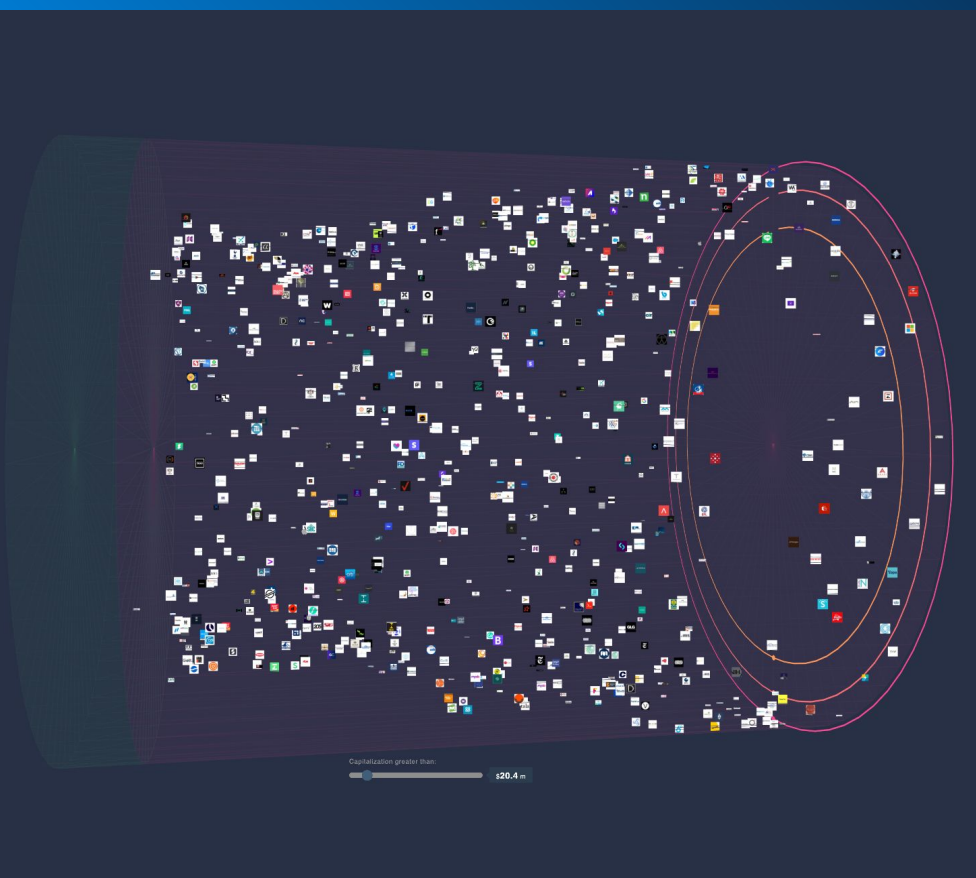

Save time and money on analyst training with a low-code solution

Y

You are the one who decides - purchase a white label solution or request creation-on-demand

Advanced Visualization. 3D Mindmaps Enhancement

Key Features

T

Think in a multi-dimensional way

U

Uniqueness is what valued across the industries. Make your data stand-out

B

Bring the future you are heading for closer, by making right decisions about the market

E

Evolve with the state-of-the-art technological solutions for alternative data analytics

K

Kick-start the solution with the same DSSM approach, allowing data management optimization

N

Nested tagging approach for in-depth search

O

Oftenly-updated and curated database to keep-up with the companies' changes

VV

Vertical Value chain: B2B focus

Data-focused Tools and Solutions: Summary

Data visualization solutions to bring more clarity to the raw data

Intellectual Property and scientific-related data to indicate the actual company background

Investors and companies brought together to illustrate the under- and over-invested areas of the industry

Market stratification through the solutions and service the companies are currently offering

Automized SWOT Analysis

Our Approach

Radial Analysis of a Longevity-Related Company

The tool is developed to visualize the overall ranking of an individual company

- 170 unique parameters
- Public and Private companies
- Any types of entities
- Due diligence
- Market intelligence
- Portfolio optimization

- Structured data
- Unstructured data
- Mixed data
- Alternative data
- Cutting-edge Natural Language Processing algorithms
- Cross-validation made by experts
- Industry-adjusted, as well as gross average constants

Radial Analysis of Five Longevity Related Companies

The tool is developed to compare a few selected companies by several hundred parameters

- Unlimited number of compared companies
- Entities from all industries and markets
- On-demand analytics and due diligence for one or multiple companies
- Comparison of hundreds of parameters in a matter of seconds

B2B Matching tools allows finding B2B partners for a given entity to meet the business needs (legal, financial services, marketing etc).

- 5 areas of cooperation analysed
- Constantly updated database of entities and labels
- Best matches and recommendation based on AI algorithms
- Integration with Automated Investor Relationship Management (IRM) System*

*Under development**

Universe of Client's Competitors

Universe of Partners Candidates

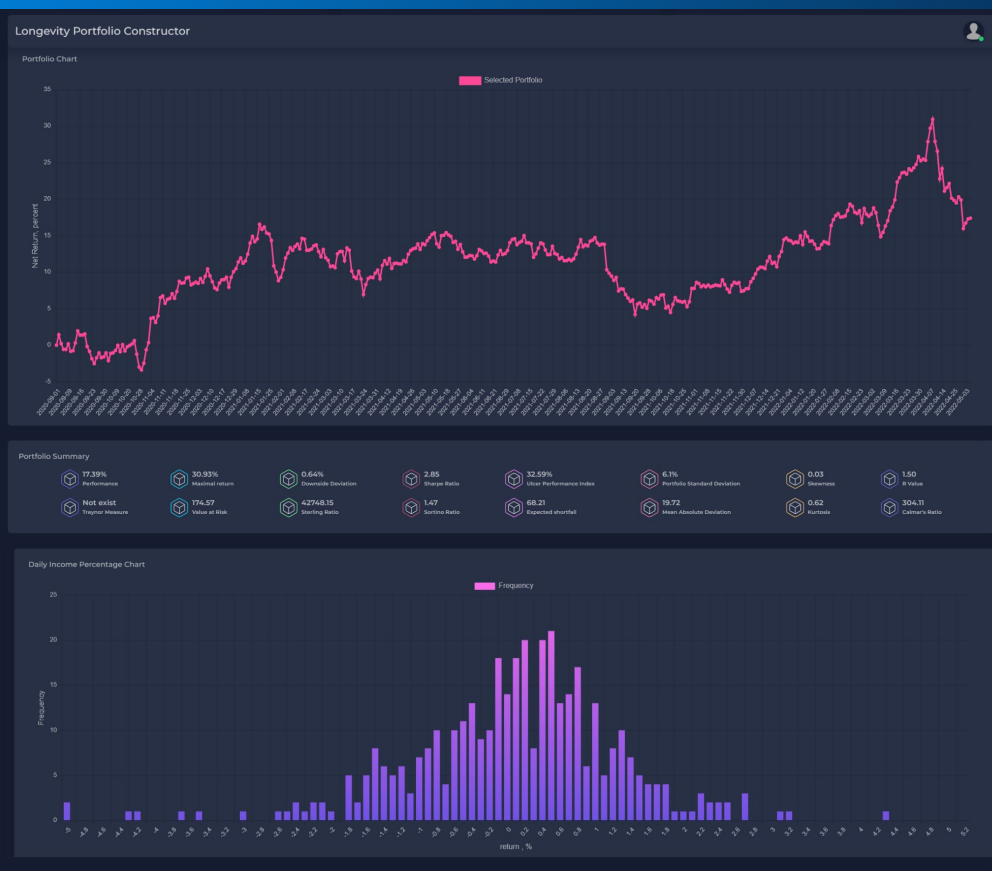

The screenshot shows the 'Longevity Portfolio Competitors' tool interface. The top navigation bar includes 'Dashboards', 'Longevity Invest.', 'Public Longevity...', 'REPORTS', 'Downloadable', 'DATA', 'Companies', 'Investors', 'Limited Partners', 'Clinical Trials', 'Funding Rounds', 'TOOLS', 'Portfolio Constructor', 'Predictions', 'Competitors', 'Comparative', 'Network Diagrams', 'DI Network Graph', 'Mindmaps', 'Rankings', 'Statistics', and 'Contacts'. The main content area is titled 'Longevity Portfolio Competitors' and shows a search for 'BTG International'. The search results include a profile for 'BTG International' with a description: 'BTG acquires, develops, manufactures, and commercializes pharmaceutical products in the United States, Europe, and internationally. It operates through three segments: Interventional Medicine, Pharmaceuticals, and Licensing. The Interventional Medicine segment offers interventional oncology products and systems, such as beads and TheraSphere for treatment of liver cancer.' Below the profile, there are three columns: 'Portfolio' (listing Avera Pharmaceutical, New Radionuclide Technology, QuNano, Senexis, Versan Medical Technologies, and Xenion), 'Competitors' (listing 112 Capital, 24 Haymarket, Bioeconomy Capital, Biomedical Catalyst Fund, 4DX Ventures, ACF Investors, Amadeus Capital Partners, Angels SK, Aris Bioscience, Atomico, and Balderton), and 'Portfolio of Competitors' (listing Pubrica Healthcare, AstraZeneca, Orca Pharmaceuticals, Phico Therapeutics, Lumira Ventures, Altacor, Veridicus Health, Morria Biopharmaceuticals, Biobank, and Bayer).

- Multiparametric comparison
- ML-based approach, enabling high recommendation precision
- Constantly updated database of entities and labels
- Integration with Automated Investor Relationship Management (IRM) System*

*Under development**

- Investors matching tool allows investors find their peers for portfolio comparison, as well as new co-investors for investment syndicates.
- Companies can leverage this tool for expansion of their investors' universe, looking for investors who are interested in the similar companies.

- 16 performance parameters
- 6 predefined ways to optimize your portfolio, along with custom weights
- 3000+ Longevity and BioTech public companies
- 2000+ DeepTech public companies

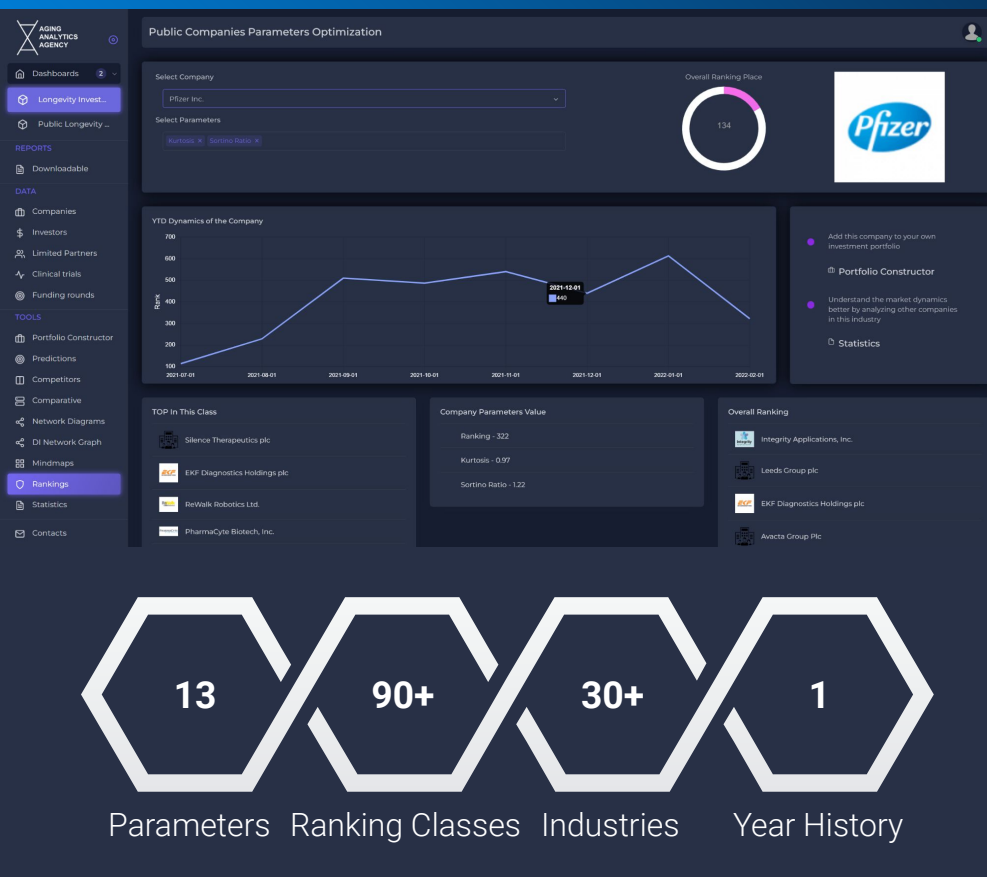

- 4 Prediction types:
 - Wiener-based
 - Adjusted GBM*
 - Prophet Model
 - LSTM
- Unlimited number of compared companies
- 8 Performance Parameters
- 5000+ Public companies

*Geometric Brownian Motion**

Public Companies Ranking

Key Features

R

Rate companies based on their comparative historical performance

A

Access clear data insights on the companies that fit your framework

N

Navigate yourself across 5000+ public companies

K

Keep the best companies for your portfolio backtesting

Hedging and Option Analysis

Why?

S

Stand out by being ahead of your competitors

E

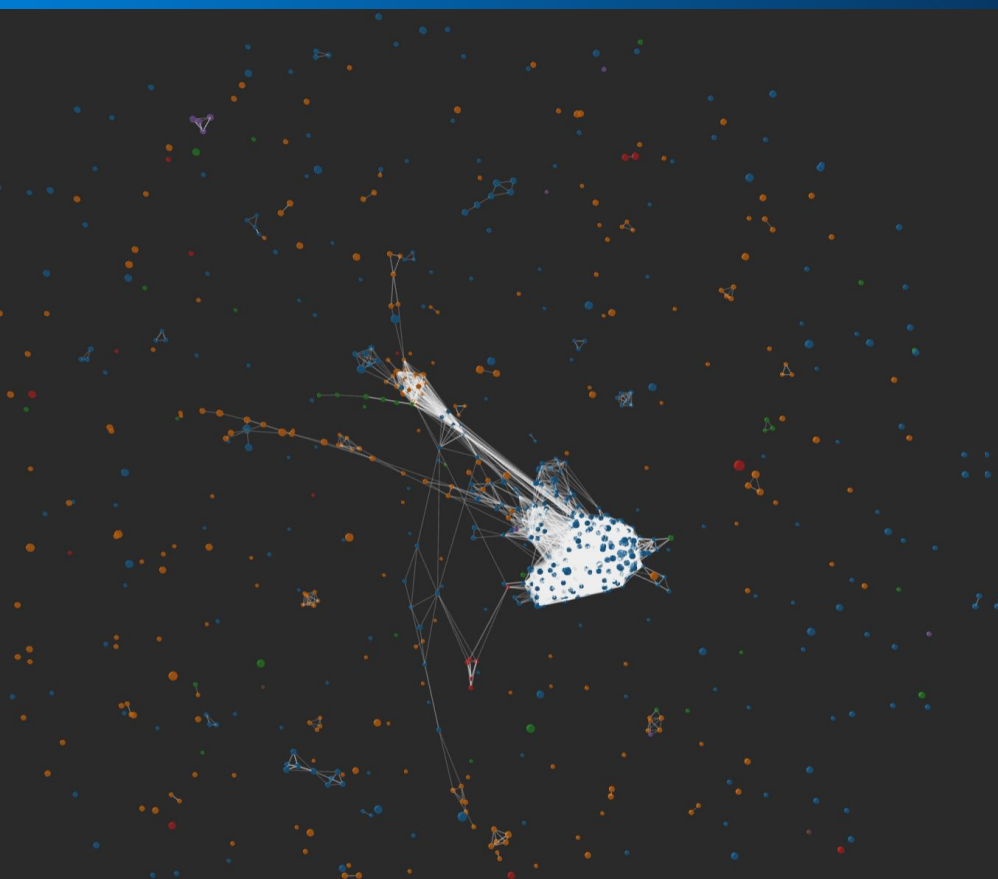

Enter the era of the all-in-one solutions that allow you to work in a stable data framework

L

Lower the error rate by accessing the analytics that make sense

L

Learn more about the development of the markets you are interested in

N

Novel approach in alternative data analysis, allowing for the harvesting of data insights without limits

E

Establish market intelligence based on quantifiable results, not opinions

W

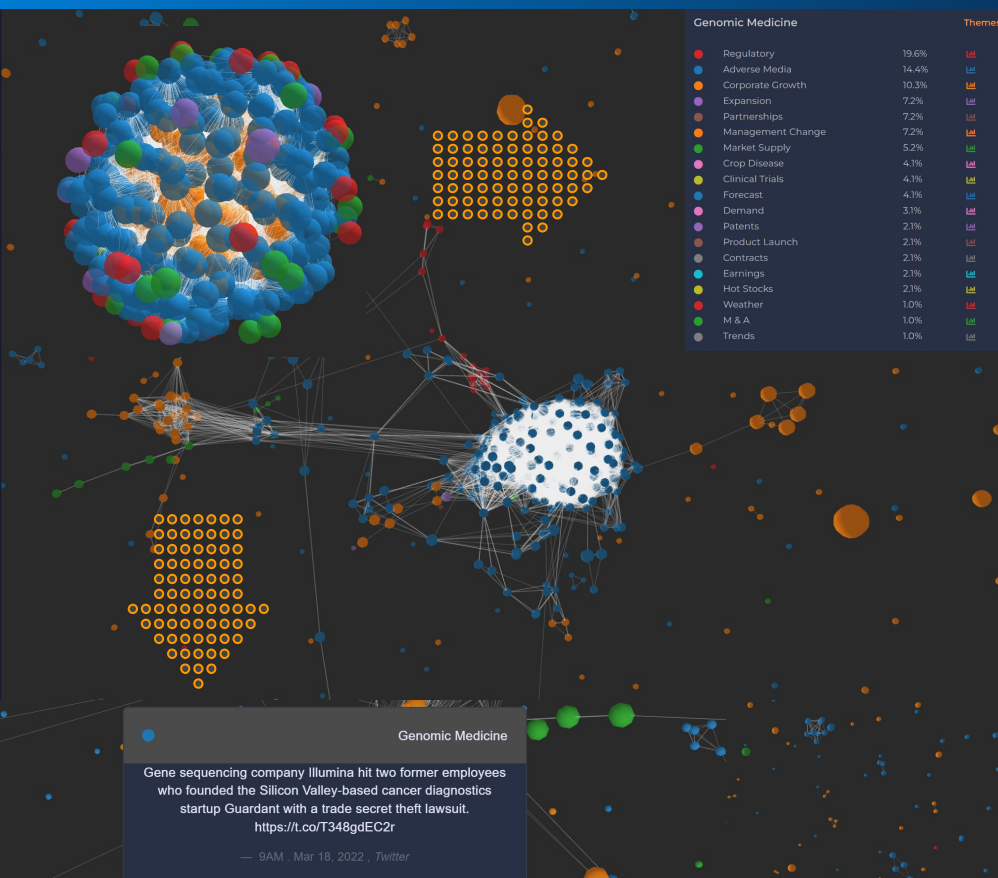

Waste no more time on data comparison and aggregation

S

Steer your company toward the new epoch of meaningful Machine Learning solutions

Trading Recommendation System

Why?

C

Create a data-based trading approach that will navigate your decisions

A

Access the opinions with thousands of experts on the topic

L

Learn about hot topics and current developments of the industry, market, or a given entity

L

Leverage Artificial Intelligence support to track changes unseen by human eyes

Technology Forecasting

Why?

S

Source tangible analytical results covering the most cutting-edge technologies out there

C

Continuous assessment of new technologies across the different areas

A

Analyze technologies from different areas with tailored metrics and find perspective startups for M&A

N

Navigate yourself across complex industries as guru

Private & Public Companies Cross Analysis

Private
Company Data

Similar Public
Companies'

Proposition Summary: Your Needs and Our Solutions

Proposition Summary

The Asia Digital Ecosystem Big Data Analytics Dashboard is robust and data-driven, designed to provide users with a comprehensive and customizable view of statistics related to Asia Digital Ecosystem companies and funding rounds. This feature offers two distinct views: Companies and Funding Rounds. Users can generate dynamic bar charts based on their custom selections of round types, main categories, secondary categories, and the type of value they want to analyze. By enabling users to tailor their data visualizations, this feature promotes deeper insights and informed decision-making within the AI industry.

The Asia Digital Ecosystem Dashboard enables users to explore and visualize essential statistics related to Asia Digital Ecosystem companies and funding rounds. By offering customization options and dynamic bar charts, this feature empowers stakeholders to gain deeper insights into the Asia Digital Ecosystem industry, make informed decisions, and stay ahead of industry trends. It serves as an indispensable resource for anyone seeking to thrive in this dynamic and rapidly evolving field.

We are open to a mutually beneficial cooperation

Core Business Models

- 1. End-to-End White Label Solution: This comprehensive solution allows clients to leverage our advanced infrastructure while maintaining their own branding. It encompasses the full spectrum of services required for seamless integration and operation.
Pricing: £2,000,000
- 2. Bespoke Thematic Blueprints (SaaS): Our SaaS offering provides tailored thematic blueprints designed to meet specific industry needs. These blueprints facilitate streamlined operations, enhanced compliance, and strategic growth.
Annual Subscription Pricing: £250,000 - £500,000
- 3. Advanced Analytics Services: We offer cutting-edge analytics services to drive data-driven decision-making. Each project is customized to address unique client challenges, delivering actionable insights and measurable outcomes.
Project-Based Pricing: £25,000 - £150,000

We are open to a mutually beneficial cooperation

Deep Knowledge Analytics Overview

Deep Knowledge Analytics is a DeepTech focused agency producing advanced analytics on DeepTech and frontier-technology industries using sophisticated multi-dimensional frameworks and algorithmic methods that combine hundreds of specially-designed and specifically-weighted metrics and parameters to deliver insightful market intelligence, pragmatic forecasting and tangible industry benchmarking.

Deep Knowledge Analytics can engage with strategic partners via several different approaches, including:

- Conduct customised case studies, research and analytics for internal (organizational) use, tailored to the precise needs of specific clients;
- Production of analytical reports for open source use (freely accessible);
- Perform customised solutions using specialised software, industry and technology databases, interactive IT-platforms.

Major Sectors of Expertise
