# \$1 Million Prize for Person to Beat the Current Human Longevity Record

With the aim of getting the ball rolling in the emerging longevity industry, Dmitry Kaminskiy announced a \$1 million prize for the first person to reach the age of 123 - just 6 months longer than the current record holder, Jeanne Calment, who achieved 122 years and 6 months age.

Deep Knowledge Group's work toward creating a truly comprehensive, actionable and relevant Longevity Industry Framework began in earnest through the release of its first formal industry framework in 2017/2018 through the publication Aging Analytics Agency's 1000+page *Longevity Industry Landscape Overview 2018* ([Volume I: The Science of Longevity](#) and [Volume II: The Business of Longevity](#)),

# Defining the Longevity Industry for the First Time

The screenshot shows the SpringerLink interface for the article 'Longevity Industry'. At the top, it identifies the source as the 'Encyclopedia of Gerontology and Population Aging', a 'Living Edition' edited by Danan Gu and Matthew E. Dupre. The article title 'Longevity Industry' is prominently displayed. Below the title, there are two tabs: 'Authors' and 'Authors and affiliations'. The 'Authors' tab lists three authors: Franco Cortese (1), Kate Batz (2), and Ian Inkster (3). The 'Authors and affiliations' tab lists three affiliations: 1. Aging Analytics Agency, Toronto, Canada; 2. Aging Analytics Agency, New York, USA; 3. Aging Analytics Agency, Biogerontology Research Foundation, London, UK. On the right side, there is a red 'Springer Reference LIVE' badge with a white download arrow icon. Below this, a dark blue box contains the text 'Encyclopedia of Gerontology and Population Aging' and the Springer logo. At the bottom left, it indicates 'Living reference work entry', 'First Online: 18 March 2020', and the DOI: [https://doi.org/10.1007/978-3-319-69892-2\\_1117-1](https://doi.org/10.1007/978-3-319-69892-2_1117-1). At the bottom right, there is a circular icon with the number '71' and the word 'Downloads'.

Aging Analytics Agency also contributed the **official definition** and entry of the '[Longevity Industry](#)' in the [Encyclopaedia of Gerontology and Population Aging](#), the world's largest and most definitive encyclopaedia on aging and Longevity compiled and edited by Danan Gu (**Population Division of the United Nations**, Department of Economic Social Affairs Population Division, New York USA).

### ABSTRACT

**Introduction:** Aging is characterized by the progressive loss of physiological capacity. At the cellular level, two key hallmarks of the aging process include telomere length (TL) shortening and cellular senescence. Repeated intermittent hyperoxic exposures, using certain hyperbaric oxygen therapy (HBOT) protocols, can induce regenerative effects which normally occur during hypoxia. The aim of the current study was to evaluate whether HBOT affects TL and senescent cell concentrations in a normal, non-pathological, aging adult population.

**Methods:** Thirty-five healthy independently living adults, aged 64 and older, were enrolled to receive 60 daily HBOT exposures. Whole blood samples were collected at baseline, at the 30<sup>th</sup> and 60<sup>th</sup> session, and 1-2 weeks following the last HBOT session. Peripheral blood mononuclear cells (PBMCs) telomeres length and senescence were assessed.

**Results:** Telomeres length of T helper, T cytotoxic, natural killer and B cells increased significantly by over 20% following HBOT. The most significant change was noticed in B cells which increased at the 30<sup>th</sup> session, 60<sup>th</sup> session and post HBOT by 25.68%±40.42 (p=0.007), 29.39%±23.39 (p=0.0001) and 37.63%±52.73 (p=0.007), respectively.

There was a significant decrease in the number of senescent T helpers by -37.30%±33.04 post-HBOT (P<0.0001). T-cytotoxic senescent cell percentages decreased significantly by -10.96%±12.59 (p=0.0004) post-HBOT.

In conclusion, the study indicates that HBOT may induce significant senolytic effects including significantly increasing telomere length and clearance of senescent cells in the aging populations.

Aviva Clinic in Israel published a paper in late 2020 claiming to have achieved human healthspan extension via Hyperbaric Oxygen Therapy.

They demonstrated this via 2 specific biomarkers, increasing telomere length by 20% and a ~35% clearance of senescent immune cells.

# IHHT - Intermittent Hypoxic-Hyperoxic Training (Mitopro)

Portable, user-friendly equipment.  
May be used at home as a high-tech wellness option.

# Longevity Personal Trainings

While my highest result to date was an HTI of 819, typically I am doing intensive trainings in the range of 300-500 HTI, which is a standard level for professional alpinist, high-performance athletes and marathon runners, and in a more relaxed daily mode I am doing trainings in the range of 170-250 HTI.

More on this topic could be found in my new book "Practical Longevity".
