Deep Pharma Intelligence Timeline

During the last four years Deep Knowledge Analytics Pharma Division and later Deep Pharma Intelligence have produced dozens of assessments of the Pharma Industry landscape and how Artificial intelligence is disrupting almost every aspect of this field dominated by large pharmaceutical companies. In May 2021, the company has published "Artificial Intelligence in Drug Discovery: Focus on Oncology" with the aim to profile an ecosystem of biotech companies and technology developers, applying advanced data analytics and knowledge extraction technologies.

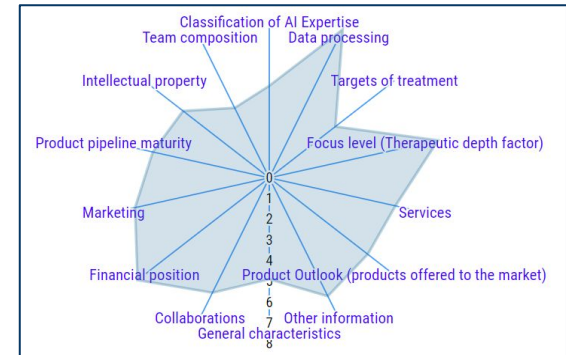

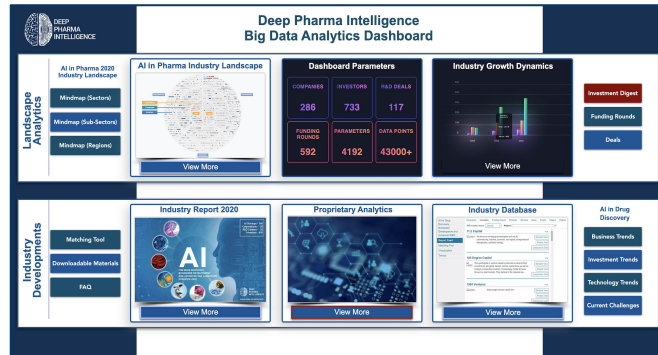

DPI is focusing on three key activities:

Building a comprehensive big data analytics platform (SaaS) as a one-stop-shop for all market and business intelligence operations our customers may need, including profiling thousands of companies, market signals and trends, based on tens of millions of constantly updated data points.

Producing regular open access and proprietary reports on the emerging topics and trends in the pharmaceutical and healthcare industries. All reports are supported by our backend analytics systems and tools, allowing to get fresh insights and updates about opportunities and risks.

Providing commercial services, including investment advisory and strategic business consulting in the areas of pharma/biotech, medtech, and healthcare tech.

Forbes

[READ THE ARTICLE](#)

"The rising trends was also observed for the sector of pharmaceutical artificial intelligence (AI). According to UK-based **Deep Pharma Intelligence**, the total amount of VC funding in AI-biotech startups increased in 2020 by around 23%, compared to 2019, approaching a total of \$1.9 billion, which is also more than in 2015, 2016 and 2017 combined. As noted by Dr. Andrii Buvailo, Director at Deep Pharma Intelligence: Some of the leading emerging players in the pharmaceutical AI race include US-based Deep Genomics, Healx and Recursion Pharmaceuticals as well as Hong Kong-based Insilico Medicine."
