The **Aging Analytics Agency** has released a platform **Diabetes Industry in the UAE.** This platform into an analysis of the diabetes market and the utilization of advanced technology in managing individuals with diabetes, with a specific focus on the UAE. Despite extensive national campaigns aimed at raising awareness about the detrimental effects of fast-food consumption and sedentary lifestyles, the Arab population still faces a heightened risk of metabolic disorders.

Within this platform, there will be a comprehensive examination of the genetic factors contributing to diabetes in Arab populations. It will also cover an analysis of the healthcare market and the key market players offering services for diabetes patients.

During the last decade the UAE demonstrated o**ne of the highest value of undiagnosed diabetes**, as well as the **high prevalence** for the disease in adults. The escalating prevalence of diabetes in the UAE, driven by changing lifestyles, poses an **economic challenge.** Projections indicate that **diabetes-related costs** in the UAE alone are **expected to increase**, reaching 24.7 billion USD by 2035.
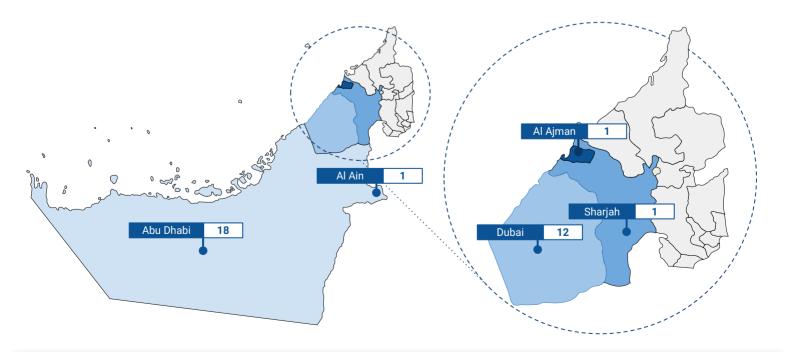

Costs	Average annual treatment costs for each one million patients
Type 1 DM average	$7.000 billion
Type 2 DM average	$2.500 billion
Without Complications	$1.930 billion
With complications	$10-20 billion
