Introduction

The report ‘FemTech Industry Landscape Q4 2022’ includes a collection of advanced analytics on the global FemTech sector, an overview of next-generation technologies adopted by FemTech companies, and projections. We hope that our stakeholders will find valuable the information provided herein. The ‘FemTech Industry Landscape Q4 2022’ is the go-to digital resource for original insights and analysis on the opportunities, challenges, and trends to watch in the FemTech sector.

Drawing on a wide range of data sources, the report provides an up-to-date overview of the most important developments in this rapidly evolving field. The report’s findings are presented in an easy-to-use format, with an interactive IT platform comprising the full FemTech ecosystem. This makes it easy to quickly identify the most important trends and developments in the FemTech sector.

The ‘FemTech Industry Landscape Q4 2022’ is essential reading for anyone with an interest in this quickly expanding field. The report profiles over 1,800 FemTech companies, approximately 2,000 investors, 30 hubs and communities, and 30 R&D centres based on their innovation potential and business activity across the globe.
FemTech Analytics

**Report Methodology and Approach**

**Company**

We consider a company to be FemTech if:

- Female health technologies are the core of company operations/production;
- The company's activity description includes a clear and straightforward affiliation with the FemTech Industry;
- The company develops FemTech-focused products/services/projects;
- At least one self-sufficient department or direction of activity work in the FemTech Industry;
- The organisation has a subsidiary that works in the FemTech Industry.

**Investor**

We consider an investor as FemTech-focused if:

- The organisation is a venture fund investing in high-growth companies that significantly improve access, care, and outcomes in women's health;
- The organisation focuses on emerging technologies, products, and services improving women's health and wellness for all age categories.

We acknowledge that scope and priorities may change as the industry grows. We continuously improve the methodology as the industry progresses.

**Technologies Used in Our Research**

**Data Aggregation and Analysis**

- Supervised and unsupervised Machine Learning
- Deep neural networks
- Natural language processing
- Data parsing
- GARCH model

**Clusterisation and Competitor Analysis**

- Brownian motion modeling for stock market forecasts
- Real option analysis, scenario planning
- K-means algorithm for companies clusterisation
- Calculation of the distance between companies in multidimensional space
- Using tag clouds to categorise companies
FemTech (Female Technology) is technology empowering women's health and well-being. This term is often applied to products, services, applications and software, medical devices, telehealth, wearables, hardware, therapeutic drugs, vitamins and supplements, digital platforms, and consumer products designed to improve or support women's health, including but not limited to those who identify as cisgender women and gender or sexual minority women.

*There is an overlap between the subsectors but FemTech ensures more holistic healthcare for women; therefore subsectors work in alignment to support the overall health of women.

FemTech Analytics
The FemTech market has developed into a robust ecosystem of start-ups and tech companies creating products to address women’s healthcare needs. Products in this market include everything from fertility tracking apps to period-tracking underwear. In recent years, there has been a surge in investment in FemTech companies, with the total amount of funding reaching $19.7 billion in December 2022 (+35% YoY). This figure is only expected to grow in the coming years, as more and more people become aware of the importance of women's health. The FemTech market presents a huge opportunity for entrepreneurs and investors alike. With its vast potential for growth, it’s an exciting time to be involved in this rapidly developing industry.

Accounting for 18.6% of the total market, Pregnancy and Nursing is the largest subsector of the FemTech Industry by the number of companies. It is followed by the Menstrual Health subsector, which accounts for 16.5%, and Reproductive Health and Contraception, occupying the third place with 16.1%. Together, these top three subsectors comprise 51.2% of the entire FemTech market.

FemTech is evolving rapidly. The most of FemTech companies are based in North America, particularly in the USA (43.4% of companies). Europe is the second-largest region, with a 26.4% share (majority of companies based in the UK). The FemTech subsector is represented less in Asian countries, MENA, and Australia.
The FemTech Industry at a Glance

The FemTech Industry can be divided into 10 subsectors covering all aspects of women’s health, ranging from Reproductive Health and Contraception to Longevity and Mental Health. The report covers 1,800+ companies and 2,000 investors. Pregnancy and Nursing, Menstrual Health, and Reproductive Health and Contraception are the largest subsectors, accounting for 51% of the entire industry.

Sources: (1) Acumen Research & Consulting
North America dominates the global FemTech market by number of companies, accounting for 47.8%. The region is booming with new start-ups and research in women's health and wellness. Europe is second with 26.4%, followed by Asia with 12.6% and MENA with 5.5%. The United States and the United Kingdom are the leading countries with the largest number of FemTech companies in the world.
With social media and the changing world, more women are speaking about their experiences, so body issues and topics that were once considered taboo have become now a new norm in public discussions.

The number of FemTech companies is constantly growing, at the fastest pace since the 2010s. The feminist movement, rapid digitalisation, and personalised healthcare have given a boost to its rapid development. Starting from 2015, over 100 companies have been founded annually.
The FemTech sector is still very new and growing rapidly. Every year, FemTech companies are becoming more and more geographically distributed. Currently, the database of FemTech Analytics counts 1,800+ companies in 75 countries while there were about 470 before 2015 in 40 countries. According to projections, the FemTech sector will double in size in order to cover additional areas of women's healthcare and technology.
At almost 19% of the total market, **Pregnancy and Nursing** (e.g. Raydiant Oximetry and HummCare) is the largest subsector of the FemTech Industry by the number of companies. It is followed by the **Menstrual Health** subsector (e.g. Calm Crew, WeerWi, and Inertia), which accounts for 16.5%, and **Reproductive Health and Contraception** (e.g. Oxolife and Noulia Health), occupying the third place with nearly 16%. Together, these top three subsectors comprise 51% of the entire FemTech market.
Accounting for 20% of the total market, **Consumer products** (e.g. SAIB and Slipp Health) has the largest share of the FemTech Industry by the number of companies. It is followed by **Devices** (e.g. EloCare and MyWelme), which accounts for 16.5%, and **Apps/Software** (e.g. Dawn and SheKnows), occupying the third place with more than 16%. Together, these top three product type comprise 52.8% of the entire FemTech market.
As with most sectors of the world economy, the FemTech sectors show the inherent prevalence of the North America investors’ (approximately 65.1%) share in terms of investor representation. In North America, the most prevalent country of origin of the investors is the USA (60.9% from all investors).

Two other significant regions that house the investors are Europe and Asia that hold second and third place, with 19.7% and 10.4% share of investors, respectively. In Europe, the majority of investors come from United Kingdom while, in Asia, the majority of investors come from India and Japan.

The rest of the investment comes from the MENA, South America, Australia & Oceania and Africa.
FemTech is a rapidly growing industry that focuses on providing products and services to improve women's health. Some 30.1% of FemTech companies are seed-stage businesses, according to the last funding type. This means that they are in the early level of development and are working to raise funds to grow their operations.

Notes: Examples of companies, but not limited to
Avestria Ventures Management LLC is a venture capital firm based in California that invests in early-stage women’s health and life science companies.

Portfolia designs investment funds for women supporting the innovations they want to see in the world for profits and impact.

Kidron Capital Assets LP is a FemTech venture capital firm that invests in medical technologies addressing women’s healthcare and well-being.

The Case for Her is a philanthropic investment portfolio addressing the key women’s health issues of menstruation and sexual health and pleasure through grants, investments, and advocacy.

Astarte Ventures is the venture fund dedicated exclusively to the health and well-being of women and children, with a primary focus on early intervention and prevention measures.

Coyote Ventures is a venture capital fund investing in early-stage start-ups that develop innovative products in the field of women’s health and wellness.

FemHealth Ventures invests in groundbreaking innovators in women’s health, focusing on drugs, devices, diagnostics, and digital applications.

Rhia Ventures is a venture capital firm with a mission to create a vibrant US market for sexual, reproductive, and maternal health that develops equitable outcomes for everyone.
Maven Clinic, a virtual women's and family health clinic, has raised $90M in Series E funding to further expand its virtual women's and family health clinic. This brings Maven's total funding to $300M, demonstrating the growing demand for health services for women and families around the world.

Delphinus Medical Technologies, Inc. is a leader in innovation in advanced ultrasound, introducing a new technique for dynamic breast imaging using sound and water. Delphinus raises $30M in Series D to bring its 3D breast ultrasound system to market.

Gameto, a biotech company that uses cell engineering to develop therapeutics for diseases of the female reproductive system, has added $17M in funding. The new funding brings total capital raised since inception to $40M.

Apricity, the UK's leading virtual infertility clinic, has raised $16.5M in Series B funding to support the company's European expansion. The company advocates a new approach to reproductive medicine that combines fertility care with technology to increase the chances of conception while offering a better patient experience.

EngagedMD adds $11M to expand its SaaS platform beyond fertility practices. Fertility practitioners around the world are using the EngagedMD platform to reduce repetitive manual tasks and simplify the patient journey. The company offers eLearn and eSign solutions to the fast-growing fertility sector, supporting the journey of more than half of all fertility patients in the US, UK and Canada.
The largest number of companies, comprising 56% out of total in the FemTech Longevity subsector, show revenue estimated in the range of $1 million to $10 million. The revenue of about 6% of companies does not exceed $1 million while 19% of players have revenue from $10 million to $50 million.
Geographically, most FemTech Longevity companies are based in North America (56%), particularly in the USA (53% of the total number of companies). Europe is the second-largest region, with a 25% market share. The FemTech Longevity subsector is somewhat less represented by Asian countries, MENA, and Australia: 6.3% in each region.
**FemTech Innovations and Gadgets**

**Gynethotics™**

Cosm is developing **Gynethotics™**, the world’s first custom-made gynecological prosthetic for female pelvic floor disorders. Cosm combines novel physiological biomarkers, AI-driven cloud software, and 3D printing to create custom pessaries designed with the unique needs of the female body in mind.

**Molli®**

Molli® makes breast cancer surgery simpler for patients, radiologists, and surgeons. After inserting a 3.2 millimeter magnetic marking device under the skin with a needle, surgeons then locate it using a wand-like tool connected to a tablet, which details the exact location of a tumor.

**Oli**

Oli is a device that uses innovative sensor technology and artificial intelligence interpretation to detect unplanned PPH during labor before the onset of postpartum bleeding. Studies predict that 80 percent of mothers with PPH can get medical care before bleeding starts using Oli, improving health outcomes and reducing risk.

**JADA System**

The **JADA System** is designed to apply a low level of vacuum to promote normal uterine contractions to provide control and treatment of abnormal uterine or postpartum bleeding. The product update includes a new set configuration with updated packaging as well as an optimised design to make the device easier to use.
FemTech Market Projections

The global FemTech market size reached $25.3 billion in 2021 and is projected to expand to $97.3 billion by 2030, growing a CAGR above 16% over the period of 2022-2030.

Growth factors:
- Increasing use of digital technologies to address women's health;
- Rising knowledge and acceptance of women's health issues;
- Growing prevalence of women-related diseases.

Constraint factors:
- Substantive underfunding of women's health and women-led businesses;
- Lack of awareness about FemTech goods and services in developing countries;
- Increasing competition, especially in the USA and Europe.
