# FemTech Industry Overview

Q4 2024

www.femtech.health

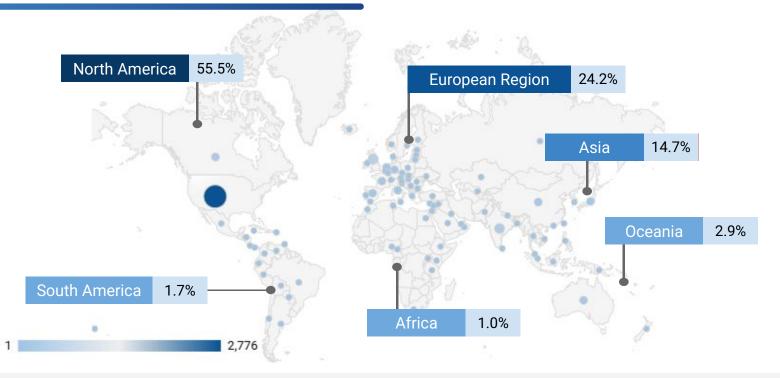

# **FemTech Market Size**

Valued at \$51.25 billion in 2023, the global FemTech market is projected to grow to \$55.86 billion in 2024 and reach approximately \$121.33 billion by 2033, expanding at a CAGR of 9% from 2024 to 2033. This steady growth highlights the increasing demand for innovative solutions in women's health.

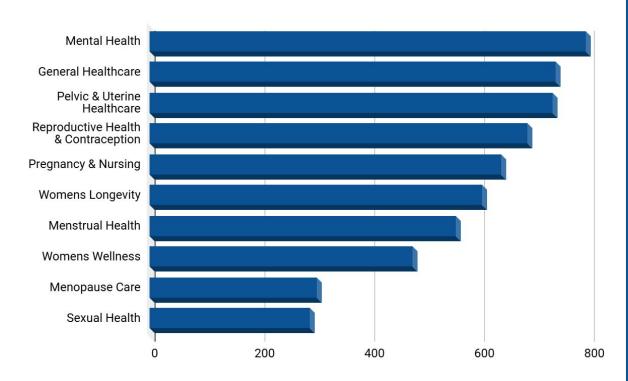

The rise of FemTech is driven by a shift in societal norms and greater awareness around women's healthcare needs. Topics once considered taboo, such as menstrual health, menopause, and fertility, are now openly discussed, paving the way for technological advancements and market growth.

# **FemTech Companies: Regional Distribution**

FemTech companies are largely concentrated in North America (55.5%), with the United States and Canada leading the way. Europe follows at 24.2%, driven by countries like the UK, Germany, and France. Asia contributes 14.7%, with China, India, and Japan emerging as key players.

# **FemTech Companies by Sectors Overview**

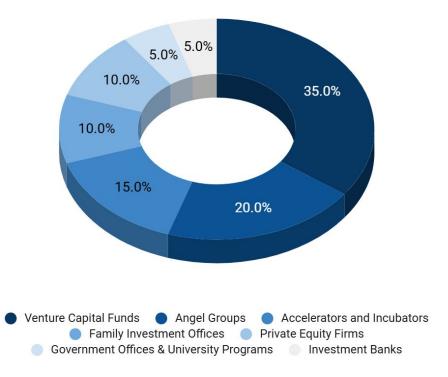

There are nearly 5,830 companies across diverse areas of women's health. Mental Health. with almost 800 companies. leads due to increasing awareness, reduced stigma, and rising demand for mental well-being solutions. General Healthcare follows with around 740 companies, emphasizing essential services, chronic disease management, and preventive care. Pelvic & Uterine Healthcare. represented by approximately 730 companies, highlights the growing focus on conditions like endometriosis and pelvic floor disorders, reflecting their significant impact on women's quality of life. These sectors dominate due to risina demand. innovation, and prioritization of women's unique health needs.

# **Distribution of FemTech Investors by Regions in 2024**

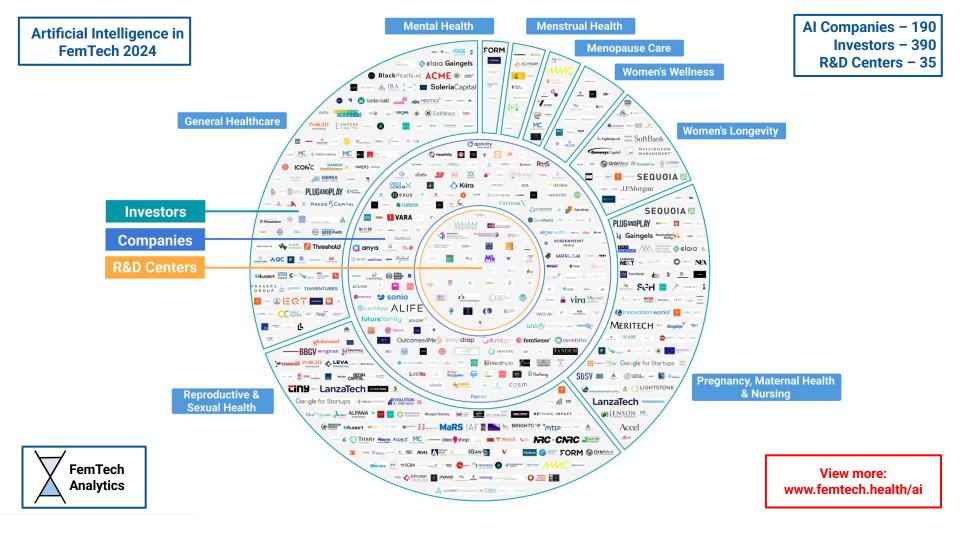

North America is still firmly in the lead in terms of the number of FemTech investors (89.6%). The European Union ranks second (6.0%).

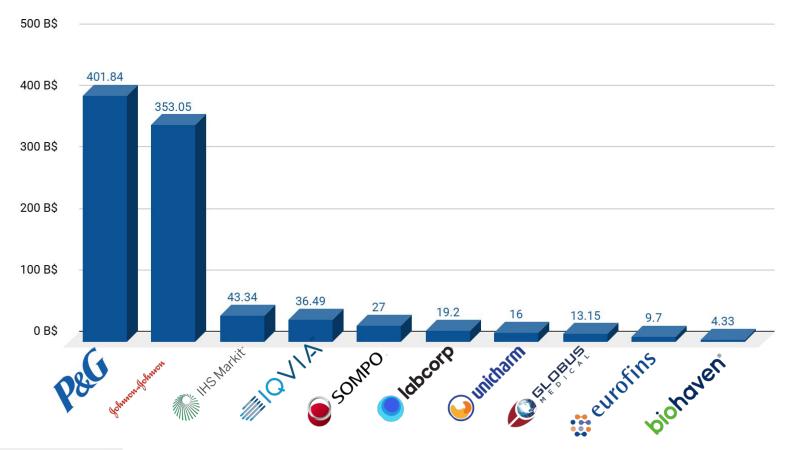

# FemTech Investors by Type, 2024

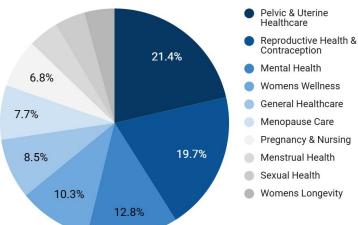

Venture Capital Funds make up 35% of the total, reflecting their dominant role in fundina startups and high-growth companies. Angel Groups account for 20%, highlighting their importance in supporting early-stage ventures. Accelerators and Incubators contribute 15%, emphasizing their role in fostering innovation and startup ecosystems. Family Investment Offices and Private Equity Firms each represent 10%, showing their focus on strategic and specialized investments. Government Offices, University Programs, and Investment Banks each account for 5%, reflecting their targeted support for public, academic. and large-scale distribution investment projects. This demonstrates a balanced ecosystem with a strong emphasis on innovation and growth.

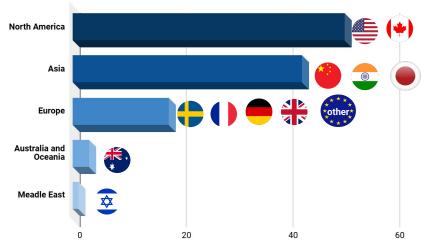

# **Top 10 Publicly Traded Companies by Capitalization in 2024**

# **Publicly Traded Companies at a Glance**

### Publicly Traded Companies by Subsectors, 2024

### Publicly Traded Companies Regional Distribution, 2024

The main focus of publicly traded FemTech companies is on subsectors such as Pelvic & Uterine Healthcare and Reproductive Health & Contraception. These two areas account for more than 40% of the market. Leading companies are investing heavily in the development of diagnostic devices and data analytics in these sectors.

Almost half of the publicly traded FemTech companies are based in North America, with 45 companies headquartered in the United States. The second largest region is Asia, with 20 companies located in China.

# Top FemTech Influencers

Q4 2024

www.femtech.health

### Sophia Ononye-Onyia

Founder and CEO of The Sophia Consulting Firm, a life science marketing and communications consultancy established in New York with the aim to amplify scientific innovation in healthcare.

### Marija Butkovic

Lawyer-entrepreneur, innovation consultant, and feminist. She is a co-founder and CEO of Women of Wearables – a leading global company aiming to support, and mentor women.

CEO and co-founder of Madorra, a medical device company dedicated to creating solutions for improving quality of life after menopause.

### **Cindy Gallop**

A brand and business innovator, consultant, coach, and keynote speaker. Drives for a gender-equal, diverse, and inclusive workplace. Strives for young women to be more sex-educated.

Estrella Jaramillo

Led the US expansion of the women's digital health solution B-wom. She is the FemTech Contributor for Forbes, covering the intersection of health, gender equality, and the workplace.

established Rachel is an authority leadership, on entrepreneurship, and women's health. She is a fearless advocate and market-maker the in multibillion-dollar global women's sexual health marketplace.

#### Gina Bartashi

Gina launched Kindbody in early 2018 with a mission to substantially increase access to healthcare by improving women's experience and outcomes and lowering costs.

An active angel investor interested particularly in the FemTech space. Her angel investments in that space include Clue, Grace Health, Daye, O School, and Boost Thyroid.

### **Jill Angelo**

CEO and founder of Gennev, whose mission is to empower women to take control of their health. Their first-ever online clinic offers access to free education, menopause coach, and wellness products.

### **Bérénice Magistretti**

Tech journalist turned to VC. Writes about "Tech That Matters," focusing on FemTech and accessibility. Passionate about women health, social impact, and consumer products in fashion and beauty.

Sophia Bendz

Women's Health Advocate, founder and CEO of Moment Health, a technology company with a groundbreaking digital solution for the prevention and treatment of women's mental health problems.

### **Trish Costello**

Founder and CEO of Portfolia, venture funds focused in areas of high returns and impact such as women's health, active aging, enterprise, AI, consumers, food, AgeTech, POC/Inclusion, and climate.

#### Ida Tin

Co-founder and CEO of Clue, the most trusted female health app. Clue enables women and people with menstrual cycles to make good choices for themselves and live full lives.

### Nicole Leeds

Eirini Rapti

Cares deeply about access to health, especially women's health. Leads the launch of Clue's newest feature: Clue Birth Control, an FDA-approved digital contraceptive.

Co-founder of Aavia, a start up that is revolutionizing women's experience of birth control by creating the first-ever smart Pill sleeve.

#### **Therese Mannheimer**

Founder and CEO at Grace Health, a health-tech company focused on developing scalable and user-friendly health services to the women online.

Founder and CEO at Inne. Inne's mission is to help women tune into their bodies and make informed decisions about their fertility, sexuality and overall health.

### **Michelle Kennedy**

Aagya Mathur

Founder of the Peanut app, which is the first social networking site to connect women at a similar stage in life. Peanut's mission is to provide a safe space for women to learn, build friendships, and find support.

#### **Brittany Barreto**

A geneticist who has launched the first DNA-based dating app (Pheramor). Advances the women's health and wellness via FemTech Focus, which is a podcast with over 100 episodes.

CEO and co-founder of Natural Cycles — the world's first, and only, app to be certified as a form of contraception in Europe and US. Her mission is to use her research and passion to pioneer in women's health..

Elina Berglund Scherwitzl

**Billie Quinlan** 

### Lea von Bidder

Co-founder and President at Ava Science, which is a company that creates sensor bracelets that offer women an easy and accurate method for tracking the menstrual cycle and finding the days when they are fertile.

#### **Alyssa Atkins**

CEO and Founder at Lilia. She created Lilia to be one place for people with ovaries to get guidance and customized answers about egg freezing, easily and all in one place.

One of the co-founders of Ferly, which aims to improve sexual wellbeing and radically transform society's relationship with sex. Passionate about women, wellbeing, and technology.

### Aashima Gupta

Director of Global Healthcare Solutions at Google Cloud, where she is contributing to the fast digital transformation of the healthcare industry via use of Cloud, AI, APIs and Mobile solutions.

#### Jordana Kier

Co-founder of LOLA, the first lifelong brand for the female body. Aims to provide products and a community to support areas of women's reproductive health – such as periods and sexual wellness – that are not openly talked about.

### Ann Garnier

Founder of Lisa Health – digital app for midlife women using science and real honesty to help them navigate through menopause and midlife health challenges.

#### **Kim Palmer**

Co-founder of Clementine App, which is a confidence app to help working women who battle with anxiety and low self-esteem to sleep better and feel confident, capable and on top of their game.

#### Laurence Fontinoy

CEO and co-founder of Woom, a data science-driven app for women's reproductive health that empowers them to maximize their chances of pregnancy.

Tania Boler

Co-founder and CEO of Elvie, which designed Elvie Trainer, an award-winning Kegel trainer for a stronger pelvic floor, and Elvie Pump, the world's first silent wearable breast pump.

### Sylvia Kang

Co-founder and CEO of Mira, which creates palm-sized devices in order to track cycles, predict and monitor ovulation, measure ovarian reserve, and detect menopause.

Liz Klinger

Co-founder and CEO of Lioness and co-inventor of the Lioness Vibrator, the first and only vibrator that helps you improve your orgasms.

### Meika Hollender

Tanvi Johri

Co-founder and President of Sustain, one of the leading brands with all-natural, vagina-friendly sexual wellness and reproductive health products.

Founder and CEO of Celmatix Inc, which is a preclinical-stage women's health biotech focused exclusively on ovarian biology, addressing areas of high unmet need.

### Ridhi Tariyal

CEO and co-founder of NextGen Jane, which provides genomics-based personalized solutions to help women track their health. It has also created a tampon that monitors for diseases affecting fertility.

Co-Founder CEO and at Carmesi, a women's hygiene company that offers all-natural and biodegradable sanitary pads and pantv liners. of Advocate women's healthcare.

### Yanghee Paik

**Piraye Beim** 

Co-founder and CEO of Rael, a company that empowers women to make healthier choices for their skin and bodies through its clean and high-performing personal care products, which are accessible all over the world.

#### Wan Tseng

FemTech entrepreneur, designer and founder of Wisp – a company with a mission to empower women, unlocking their sensuality via personal experiences with design and technology.

Saundra Pelletier

**Cecile Real** 

CEO at Evofem Bio science, which is a clinical-stage biopharmaceutical company developing innovative products to address women's sexual and reproductive health.

Entrepreneur, passionate yogi, FemTech enthusiast, and founder and CEO of iBreve – a wearable device that fights stress in a simple, natural, and instant way.

### Debra Duke

Founder, President and CEO of MenoGeniX, a biotechnology company in the clinical stage which is focused on treating hot flashes and other menopausal symptoms.

CEO at Endodiag, a biotechnology company that specializes in the development of products and services aimed at improving the diagnosis of endometriosis.

### Amy McDonough

Flavia Wahl

Strategy & Operations at Fitbit Health Solutions, which has created a highly engaging and personalized healthcare solution comprising wearable devices, self tracking, health coaching, and virtual care.

### Chia Chia Sun

Pharmaceutical business executive with extensive research and development experience. She is now CEO of Damiva, a women's health company manufacturing all-natural products for menopausal health.

Chief Operating Officer at Glow, an enterprise that offers personal health products powered by data to help people manage their health. Owns four apps ranging from periods to parenting.

Jennifer Tye

Nicole Dahlstrom

**Amy Domangue** 

Expert in women's healthcare marketing and innovation. CEO and Co-Founder of Jessie, an online platform that streamlines access to women's digital health services.

### Mylene Yao

Co-founder and CEO of Univfy Inc., a predictive analytics company that uses machine learning to help more women access in vitro fertilization (IVF) treatments to build healthy families.

Co-founder and COO of FemTech Collective, which offers products and services to help female-focused health technology startups to overcome barriers to success, by connecting communities.

### **Reenita Das**

Healthcare evangelist and strategist, voted one of the top 100 women in Healthtech and FemTech. Well-known author of "The Rise of SHEconomy: Female Economic Power."

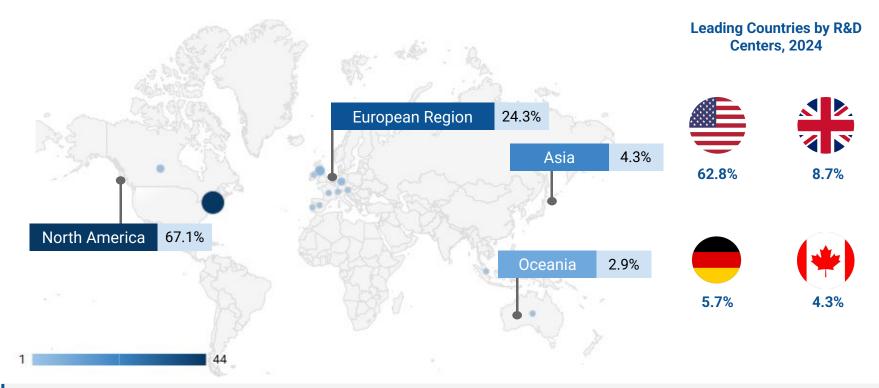

# **Hubs and R&D Centers**

Dedicated to advancing maternal and feta medicine, this symposium addresses pregnancies complicated by diabetes, hypertension and metabolic syndrome, and explores the integration of FemTech solutions in these areas.

# FemTech Market Trends Overview

Q4 2024

www.femtech.health

Currently, the majority of FemTech companies are concentrated in the Fertility and Pregnancy sub-sector. However, this focus is expected to shift in the coming years. Emerging areas such as menopause, SexTech, mental health therapies, and breastfeeding solutions are gaining traction and are set to drive the next wave of growth.

Several key factors are shaping the future direction of the FemTech industry in 2024:

- By 2024, demand for FemTech solutions will rise, with growing opportunities in underserved areas like menopause, SexTech, and mental health.
- The fertility market, expected to reach \$41 billion by 2026, will continue to expand, especially in emerging markets.
  Wearables and smart medical devices are on the rise, contributing to the growth of FemTech, with the global wearable market reaching \$70 billion by 2024.
- Additionally, DNA testing for conditions like breast cancer is becoming more accessible, driving innovation in personalized women's healthcare. These trends create significant growth potential for FemTech companies in the coming years.

# **Key Market Trends**

### In-Home Testing and Portable Devices

As awareness of women's health grows, there is increasing demand for early disease detection through testing solutions. in-home Portable devices, like wearable fertility monitors or ovulation kits, are designed to empower women to monitor their health in a private and convenient setting. Software analyzes health that indicators, such as hormone levels and menstrual cycles, is making at-home care more and accessible, accurate bridging gaps in healthcare access.

### Personalized Healthcare Solutions

### Endometriosis-Focused Startups

The shift toward tailored approaches in FemTech addresses the unique health needs of women at various stages of life. Solutions for managing heart health. chronic pain, diabetes, and weight are being designed with female physiology in These personalized mind. offerings ensure that women receive targeted care and support for conditions often overlooked in traditional healthcare systems.

Endometriosis, a painful and often misdiagnosed condition affecting 1 in 10 women, is finally gaining the attention it deserves. Startups are with innovative emerging diagnostic tools, non-invasive treatments, and support solutions to address this widespread issue. The global endometriosis market is projected to reach \$2.3 **billion**, reflecting increased awareness and investment in improving quality of life for millions of women.

### **Menopause Solutions**

With the aging female population on the rise due to "Silver Wave." the the menopause market is seeing rapid development. Until recently, menopause-related healthcare was underdeveloped, leaving millions of women underserved. Now, products like hormone replacement therapies,

menopause-specific

supplements, and wearable devices to manage symptoms like hot flashes and sleep disturbances are gaining traction, addressing this critical life stage for women.

# **Key Market Trends**

### Menstrual and Pregnancy Tracking Apps

Apps like Clue and Flo have revolutionized how women track their menstrual cycles and stages of pregnancy. These apps offer insights into ovulation, hormonal changes, and prenatal health, empowering users to better understand and manage their bodies. The popularity of these tools is driving further innovation, with features like telemedicine consultations and personalized health tips being integrated into newer platforms.

### **Fertility Innovations**

Advances in fertility care are transforming the FemTech market. Technologies like embryo scanning. non-invasive genetic testing, and egg freezing are becoming more accessible. offering hope new to individuals and couples families. seeking to start Startups are entering this with user-friendly space solutions and affordable services. addressing the growing demand for reproductive healthcare.

### Al Integration in FemTech

Artificial Intelligence is revolutionizing how FemTech solutions are developed and delivered. From AI-powered diagnostic tools that detect early signs of ovarian cancer personalized skincare to recommendations and fertility solutions, AI enhances precision and efficiency. This trend is also helping in the development of chatbots for sexual health advice and virtual health assistants, making healthcare more interactive and responsive.

### **Device Innovation**

The FemTech device segment, projected to make up 16% of the market by 2025, is thriving with advancements in user-centric technologies. Products like wearable breast pumps, which offer discreet and efficient milk expression, and pelvic floor exercise devices that aid in postpartum recovery, exemplify how innovation is improving women's daily lives. devices These prioritize comfort, convenience, and effectiveness. addressing needs that have long been overlooked.

# **Key Market Trends: Menopause Solution**

85% of women are experiencing a menopause-related symptom **1.1 Billion Women** will be experiencing menopause by 2025 93% of menopausal women are interested in non-invasive tech solutions

Emerging trends in the menopause market are already shaping its future. **Wearable devices** will play a key role, providing real-time, Al-powered personalized recommendations to manage symptoms. Symptom tracking apps will evolve to offer proactive solutions, combining data insights with telemedicine for more tailored care. Al-based telemedicine and **digital therapeutics** will offer personalized, non-invasive approaches for managing menopause. Additionally, **personalized PharmTech** platforms will deliver custom non-hormonal treatments, including supplements and lifestyle adjustments, based on individual health profiles.

Key market drivers include the growing **aging population**, with more women entering menopause in the coming years, and increasing **health awareness**, which will fuel the demand for alternative, personalized solutions. As **technological advancements** in AI, wearables, and machine learning continue to progress, more effective and data-driven menopause care will become widely available.

The future of menopause solutions in FemTech is highly promising, with technology driving more accessible, personalized, and non-invasive options for women worldwide.

# **Key Market Trends: Al Integration in FemTech**

85% of FemTech Startups are integrating AI and machine learning in their products. \$2.9 Billion the market for Al-driven diagnostic tools in women's health by 2027 70% of Women

are open to using Al-powered solutions for health monitoring and symptom tracking.

Al integration in FemTech is transforming women's healthcare by offering personalized, data-driven solutions across fertility, menopause management, and wellness. Al tools improve fertility tracking, predict ovulation cycles, and support family planning. In menopause, Al helps monitor symptoms and suggest lifestyle changes or alternative therapies, while apps enable real-time symptom tracking.

Al is also enhancing diagnostics, enabling early detection of breast and cervical cancer through medical imaging and genetic analysis. Telemedicine platforms use Al for virtual consultations, expanding access to care.

With advances in machine learning and big data, AI is delivering more predictive and personalized healthcare. As women's health awareness grows, AI's role in addressing complex health issues will continue to expand, providing more effective and accessible solutions.

## **Key FemTech Market Development Factors**

As already mentioned, the FemTech market has great untapped **growth opportunities**. The above-presented factors will lead to the fulfilment of market potential in the near future. Despite the market share having enormous potential, women represent only half of the planet's population, and so far, the development of the FemTech market has occurred predominantly in the developed world. That is why it is crucial to make FemTech products and solutions **accessible** and **affordable**.

At the same time, working-age women spend 29% more per capita on healthcare than men and are 75% more likely to use digital tools for healthcare. **Customized revenue models**, for example, renting devices for a limited period of use, for example, will stimulate this trend. Since 2016, a number of **governmental initiatives** have been launched to support modern digital applications for the treatment of conventional women's health issues.
