Section 1: Deep Knowledge Group Corporate Structure, Activities and Agenda

Deep Knowledge Group Corporate Vision and Strategic Agenda

Deep Knowledge Group is a data-driven consortium of commercial and non-profit organizations active on many fronts in the realm of DeepTech and Frontier Technologies (AI, Longevity, BioTech, Pharma, FinTech, GovTech, SpaceTech, FemTech, Data Science, InvestTech), ranging from scientific research to investment, entrepreneurship, analytics, consulting, media, philanthropy and more.

As a mathematical corporation focused on building the bridge to the 5th Industrial Revolution, Deep Knowledge Group is decisively committed to DeepTech for Social Good, Techno-Philanthropy and DeepTech and Longevity Industry Financial Commoditization (establishing the core investment and financial industry infrastructure needed for the emergence of DeepTech and Longevity as fundamentally new asset classes).

We are open to cooperation with a wide variety of organization-types according to a wide variety of collaboration scenarios and terms, including commercial, equity-swap, pro-bono and strategic, including:

| SCENARIO #1 | SCENARIO #2 | SCENARIO #3 | SCENARIO #4 |
|---|---|--|---|
| Joint Venture, Project or Product Establishment | Improve Your Products With Our SaaS and White Label Solutions | Co-Investment in Deep Knowledge Group Projects | Partnership Platform: Sales, Engagement and Relations on Our Behalf |

Dmitry Kaminskiy - Founder and General Partner

Dmitry Kaminskiy

[Deep Knowledge Group](#)

Co-Founder / General Partner

[Longevity.Capital](#) / Co-Founder

Deep Knowledge Ventures / Co-Founder

[5th Industrial Revolution Institute](#) / Co-Founder

[Biogerontology Research Foundation](#) / Managing Trustee

[Longevity International Association](#) / Co-Founder

[Philanthropy.International](#) / Co-Founder of the Project

Dmitry Kaminskiy is an innovative entrepreneur and investor dedicated to the acceleration of Longevity and DeepTech Industrialization and Financial Commoditization. He is also the author of several books including *The 5th Industrial Revolution* and a Techno-Philanthropist devoted to hastening the pace of technological progress for the benefit of global society.

Mr. Kaminskiy is a Co-Founder and managing partner of Deep Knowledge Group, a data-driven consortium of commercial and non-profit organizations active on many fronts in the realm of DeepTech and Frontier Technologies (AI, Longevity, BioTech, Pharma, FinTech, GovTech, SpaceTech, FemTech, Data Science, InvestTech), ranging from scientific research to investment, entrepreneurship, analytics, consulting, media, philanthropy and more.

As a mathematical corporation focused on building the bridge to the 5th Industrial Revolution, Deep Knowledge Group is decisively committed to DeepTech for Social Good, Techno-Philanthropy and DeepTech and Longevity Industry Financial Commoditization (establishing the core investment and financial industry infrastructure needed for the emergence of DeepTech and Longevity as fundamentally new asset classes).

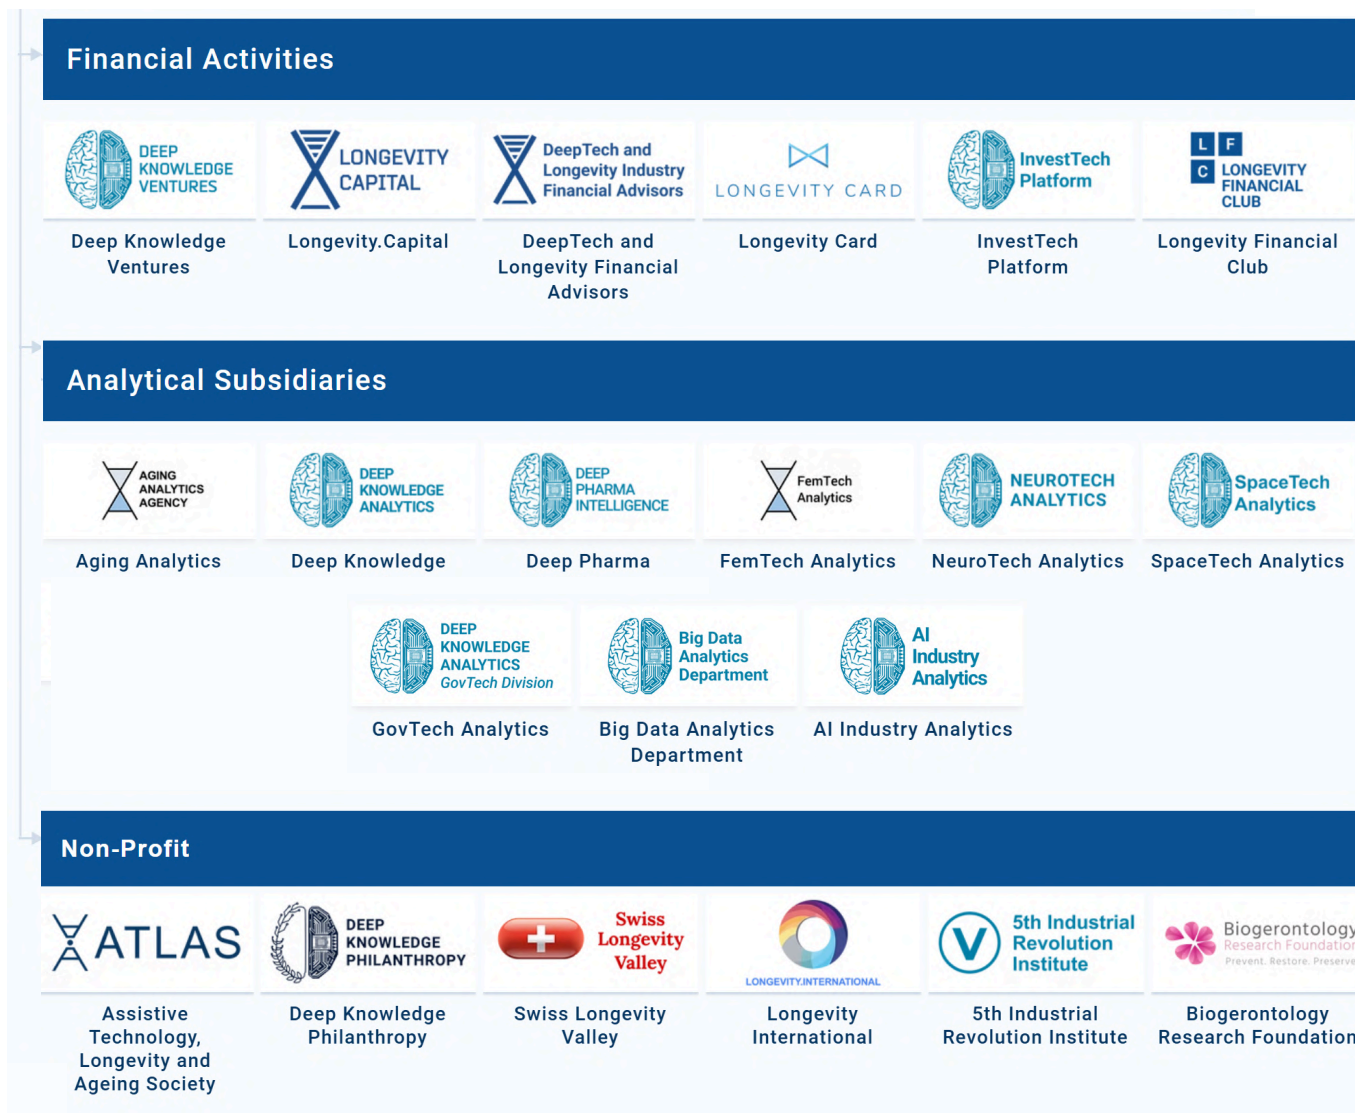

Dmitry leads the activities of the consortium's venture arms - Deep Knowledge Ventures, an investment fund focused on DeepTech and advanced science projects, Longevity.Capital, which prioritizes the convergence of Longevity and Artificial Intelligence, areas in which it has unparalleled investment and exit strategies, and DeepTech and Longevity Industry Financial Advisors, the consortium's dedicated DeepTech and Longevity Financial Commoditization subsidiary launched with the mandate of establishing the integral financial infrastructure (platforms, indices, exchanges, financial instruments and derivatives) needed for accelerated and de-risked DeepTech and Longevity Industrialization, and their emergence as fundamentally new asset classes.

Dmitry Kaminskiy is author of the books 'Biomarkers of Human Longevity' and 'Longevity Industry 1.0 - Defining the Biggest and Most Complex Industry in Human History'. www.longevity-book.com

He also closely supervises the work of the 5th Industrial Revolution Institute, a social enterprise launched to carry forward Deep Knowledge Group's long-standing vision and mission to ensure that all necessary technological and infrastructural components of the 5th Industrial Revolution are in place before the year 2030.

Section 1: Deep Knowledge Group Corporate Structure, Activities and Agenda

Deep Knowledge Group Organizational Structure

Financial Activities: The venture arm of Deep Knowledge Group (DKG) has been an active investor in Frontier Science and Technology domains since 2014, and the consortium has a number of domain-specific finance-focused subsidiaries and projects. Since 2022, the focus of its financial arm has been on defining and developing the core investment and financial industry infrastructure (platforms, indices, exchanges, financial instruments and derivatives) required for DeepTech and Longevity Industry Financial Commoditization and the emergence of these industries as fundamentally new asset classes.

Analytics: DKG's 10+ thematic analytical subsidiaries across Longevity, BioTech, Pharma, FemTech, AI, GovTech and DeepTech are the knowledge engines driving the consortium's long-term strategic agenda, technically unprecedented in their capabilities for domain-specific analytics, market intelligence and monitoring, benchmarking and forecasting, their understanding of complex industry dynamics and their ownership of best-in-class databases, technical and methodological IP and Big Data Analytics Systems.

Non-Profit (Techno-Philanthropy and DeepTech for Social Good): DKG has been committed since 2014 to the corporate thesis of DeepTech for social impact, techno-ethical business for social good and the creation of tangible socioeconomic benefit as a core ROI. It has a number of non-profit subsidiaries applying Techno-Philanthropic approaches to its core areas of focus, including DeepTech and Longevity.

Section 2: Deep Knowledge Group Internal Tools and Platforms

Internal Corporate Productivity Enhancement Tools and Platforms

In order to establish core asymmetric advantages over our primary competitors in a lean and sustainable manner, and achieve technical equivalency or supremacy with organisations having much greater capital resources than us, Deep Knowledge Group (DKG) has developed an end-to-end infrastructural suite of tools, platforms and solutions for streamlining workflows, enhancing productivity, and fostering more efficient team and cross-department collaboration, **enabling 10x the output that would be otherwise possible with its current workforce, with substantive emphasis on massive platformization and AI Co-Pilot development and integration.**

These internal platforms utilize a sophisticated scope of back-end and front-end infrastructure streamlined for internal use by DKG personnel (and in some very select cases by DKG-authorized external partners and project-specific representatives), with the primary purpose of creating a consolidated, maximally automated, efficient and cyber-secure collaborative workspace (typically only accessible via sign-in using a dkv.global email address) for designing, developing, managing, monitoring, tracking, executing and reciprocally learning from the execution of Deep Knowledge Group projects, products, thematic multi-project workflows and entire departments.

The screenshot displays the 'Deep Knowledge Group Organizational Admin System' interface. At the top, it shows the user's name 'Franco Cortese'. The main dashboard is divided into several key sections:

- Big Data Analytics System & Dashboards:** A central hub with metrics: 70+ DASHBOARDS, 67 PEOPLE, 800+ PROJECTS, 20 COMPANIES, 70+ SAAS AND FRONTEND, and 200 IT PLATFORMS.
- Implemented and Ongoing Projects:** Lists various project categories like Big Data Analytics, Longevity, and Pharma.
- Next-Generation SaaS and Frontend Tools:** Lists tools like 2D and 3D Frontend components, Dashboards constructor, and Infographics.
- The 5th Industrial Revolution:** A grid of technology categories including Ls (Life Sciences), Ba (Business Analytics), ML (Machine Learning), Fd (Financial Data), RI (Risk Intelligence), Dt (Data Technology), In (Innovation), It (Industrial Tech), Cc (Cloud Computing), and others.
- AI Agents:** A grid of AI-powered tools such as Longevity GPT, Legal Eagle, DKG IT Assistant, DKG Database Assistant, Privacy Law Navigator AI, and DKG GovTech Guide.

The right sidebar contains a list of 'IT TOOLS' and 'Folders', including items like 'Ecosystem Mapping', 'Constructor Folder', 'Multi-Dimension Vector Space', and 'GeoDashboard Constructor 2.0'.

Scope of Projects

DeepTech and Longevity Financial Commoditization

Developing the ecosystemic infrastructure (platforms, indices, exchanges, financial instruments and derivatives) to support the emergence of DeepTech and Longevity Industries as fundamentally new asset classes

Big Data Aggregation, AI-driven Analysis, and Visualization

Automatized data parsing, aggregation, optimization of machine learning and deterministic scoring algorithms for competitor matching, and due diligence results

Financial Insights and Investment Strategies

Modern InvestTech solutions and DeepTech investment approaches driven by Data Science and Big Data Analytics

Section 3: Deep Knowledge Group Flagship Projects and Products

- 1. End-to-End Synthetic Operational Environment, Business Intelligence, Investment Relations Automated Business Development Dashboard (White Label Solution):** sophisticated end-to-end White Label Solution for Tech Industry investment universe analysis, monitoring, market intelligence, benchmarking, automated business development and investor relations - the N1 technologically sophisticated data-driven and AI-augmented solution to corporate defence, development and management in the 21st century. www.dkg-platform.solutions/business-intelligence
- 2. Industrial Ecosystem Mapping Platform Production for Governments - Advanced Solution for Attracting Inward Investments and Showcasing National Competitive Strengths:** the world's most advanced tech-stack for creating interactive domain-specific, regional, industrial and corporate ecosystem mapping platforms to showcase the unique strengths of tech, innovation and industry ecosystems in an unprecedentedly advanced, technologically robust and visually sophisticated manner. Ideal means for government authorities and related entities to expand their international visibility and recognition, create the impression of a one-stop-shop or analogy to digital virtual 'Pavilion' for its mission, achievements and assets, optimize and expand their engagement efforts with regards to attracting inward investment, create and consolidate a maximally actionable and tactical next-generation Brand Kit, and build a maximally sophisticated, interactive, immersive digital environment for lead capture and conversion that serves as a semi-automatic mechanism for attracting relevant leads to approach them for cooperation, rather than the other way around. www.ecosystem-map.info
- 3. Corporate Ecosystem Mapping Production - Advanced Solution for Corporate Brand Enhancement and Business Development Engagement + Relations:** Utilizing the same scope of advanced ecosystem mapping platform technologies, these services focused on ecosystem platform development for corporations, and offers clients a technologically sophisticated, visually engaging and psychologically impactful showcase of their assets and achievements and a powerful lead engagement tool ideal for lead and stakeholder negotiations and public promotion. www.ecosystem-map.info/corporate
- 4. Longevity Club End-to-End White Label Solution for Longevity Medicine AI, Digital and IT Infrastructure:** End-to-End technological ecosystem, featuring a full-stack IT platform, with desktop and mobile apps, precision medicine scientific solutions, empowered by digital virtual infrastructure and AI-driven core analytical system. Its core value proposition is in the technological sophistication and ease-of-use of its core systems and infrastructure, the extremely high-quality understanding of Longevity Medicine that its diagnostic, prognostic and treatment protocols are based upon, the emphasis on sophisticated component integrability that its ecosystem offers and the diversity of options it offers clinics (i.e., the plug-and-play configurability of its ecosystem components). Whether clinics wish to compliment their existing physical facilities with engaging, ergonomic and powerful AI, digital and IT infrastructure, expand into Longevity Medicine services using best-in-class protocols, or optimize very specific clinical pipelines for particular use-cases, Longevity Club's End-to-End White Label Solution has what they need to succeed. www.longevity.group
- 5. Synthetic Longevity Industry Mega-Dashboard: End-to-End Pipeline of Thematic Domain-Specific Longevity Industry Dashboards: Longevity Investment, Financial**

Section 3: Deep Knowledge Group Flagship Projects and Products

industry, Medicine, Clinics and Governance: an integrated end-to-end pipeline on thematic Longevity Dashboards and Big Data Analytical Systems, including Longevity Investment, Public Companies, Financial Industry, Global Governance, UK Governance, and Global Medical Clinics. As developers, owners and ultimate beneficiaries of the largest Longevity Industry Database in the world, we have developed a number of domain-specific Big Data Analytical Systems (BDAS) and market intelligence dashboards on top of this unique asset. www.deep-innovation.tech/longevity-dashboard

- 6. AI Pharma Business Intelligence, Investor Relations, Business Development Operational Environment Big Data Analytics Dashboard:** end-to-end solution for AI Pharma-focused corporate strategy optimization and defence, semi-automated AI-driven business development, investor relations, partnership and client acquisition and corporate growth, competitive and market intelligence, and operational environment monitoring, forecasting and analytics. <https://www.deep-pharma.tech/products>
- 7. Full-Stack Corporate Defense and Investment Intelligence System - Investment Analytics, Operational Environment Monitoring and Modeling, and Corporate Protection:** Sophisticated end-to-end White Label Solution for corporate operational environment analysis, monitoring, competitive and market intelligence, automated business development and investor relations: the no.1 technologically sophisticated data-driven AI-augmented solution for corporate defence, development, and management in the 21st century. Capable of customised, comprehensive corporate strategy optimization and defence, semi-automated AI-driven business development, investor relations, partnership and client acquisition and corporate growth, competitive intelligence, operational environment monitoring and analytics. In its full scope, the system gives its users a guaranteed systemic asymmetric advantage over their operational environment peers and competitors. Through increasingly realistic levels of emulation (increasing data depth and number of modelled parameters), the system provides total awareness of the client's operational environment, and distinguishes between different types of awareness including informational, disinformational operational environment, synthetic operational environment awareness.

Structure of Deep Knowledge Group MetaFund

- Mathematical Financial Corporation with a Focus on DeepTech and Longevity Industries
- Our AI and Data Science Department is our #1 Asset
- Besides Focus on Financial Profit we also Prioritize Techno-Philanthropy Projects
- Financial Commoditization of DeepTech and Longevity Industries

Section 3: Deep Knowledge Group Flagship Projects and Products

Scenarios for Cooperation

- **Establishment of Joint Ventures, Projects and Products: Large-Scale Longevity and DeepTech Ecosystemic Infrastructure Projects or New Product, Service and Technology Development**
- **Use Our Solutions to Improve Your Product Offering: White Label Solutions and SaaS**
- **Co-Investment into Deep Knowledge Group Projects**
- **Partnership Platform: Make Sales, Engagements, Partnerships and Business Development Relations on Deep Knowledge Group's Behalf**

[Deep Knowledge Group](#) (DKG) is active on many fronts from commercial product development to investment, philanthropy, advanced technology development, next-generation projects, DeepTech, AI and Longevity Industry Financial Commoditization and novel financial infrastructure development, as well as highly proprietary Next-Generation Strategic Projects Development. We are open to cooperation with a wide variety of organisation-types according to a number of collaboration scenarios and terms, including commercial, equity-swap, pro-bono and strategic.

Cooperation types and options include:

| SCENARIO #1 | SCENARIO #2 | SCENARIO #3 | SCENARIO #4 |
|--|---|---|--|
| Joint Venture, Project or Product Establishment <ul style="list-style-type: none"> ● Large-scale ecosystemic infrastructure projects ● DeepTech, AI and Longevity Industry Financial Commoditization projects ● New product and service development ● Repurposing our products for new use-cases, regions and markets | Improve Your Products With Our SaaS and White Label Solutions <ul style="list-style-type: none"> ● Big Data Analytical Dashboards (Market Intelligence Systems), Ecosystem Mapping and Advanced Visualization SaaS ● Integrate DKG products assets into your own product line ● Use DKG products as brand and BizDev assets ● Options for end-to-end White Label Solution or individual SaaS model | Co-Investment in Deep Knowledge Group Projects <ul style="list-style-type: none"> ● Deep Knowledge Group invests in and subsidises many of its commercially prospective projects itself, by preference ● However, we are open to accepting select co-investors in our projects ● Such investors shall most often be of a strategic nature | Partnership Platform: Sales, Engagement and Relations on Our Behalf <ul style="list-style-type: none"> ● Make Sales, Engagements, Partnerships and Relations on DKG's behalf using our PartnerTech Platform ● Aggregates our own BizDevTech tools, techniques and templates in one place for partner use ● Developed by direct demand of external contacts wanting to sell our projects and products to their networks |
| We are open to a mutually beneficial cooperation | | | |

Parties interested in cooperation can [write to us directly](#), submit a project-specific expression of interest via our [Open Projects Platform](#), request access to our full NDA-protected [Structured and Saleable Projects Platform and Data Rooms](#), or apply to become a Regional Partner authorized to make engagements on our and our projects' behalf via our [Open Partnerships Platform](#) (Password: DKG2024).

Establishment of Joint Ventures, Projects and Products: Large-Scale Longevity and DeepTech Ecosystemic Infrastructure Projects or New Product, Service and Technology Development

Deep Knowledge Group is most interested in large-scale joint projects, products and ventures with high-calibre organisations in the domains that constitute our long-term strategic priorities ([Longevity](#), [AI](#), [Techno-Philanthropy](#), DeepTech and Frontier Science and Technology), ranging

Section 3: Deep Knowledge Group Flagship Projects and Products

from commercial ventures (e.g., [Longevity Club](#) and other products at the intersection of Practical Longevity and Space Medicine) to novel financial infrastructure development (DeepTech and Longevity indices, stock exchanges and MTFs, financial instruments and derivatives, InvestTech platforms and [Financial Commoditization](#) projects, etc.).

We are also open to JVs that repurpose our existing IP (e.g., Big Data Analytics Dashboards and Market Intelligence Systems) for new markets and use-cases. Indeed, in every JV and joint product we engage in, one of our strongest value contributions beyond deep domain-specific knowledge, unprecedentedly comprehensive databases and highly sophisticated market intelligence assets is the vast amount of unique ready-for-use technological stacks and IP that we bring to the table.

We have a rich history of joint venture establishment and joint project development and a wide range of existing infrastructure, LegalTech stacks, and ready-for-transfer technical, technological, IT and IP assets which create the basis for very efficient new project set-up and JV establishment.

Use Our Solutions to Improve Your Product Offering: White Label Solutions and SaaS

DKG has a wide range of SaaS and White Label Solution-based product offerings, especially in the realm of DeepTech, HealthTech and Advanced Technology analytics, benchmarking, forecasting, monitoring and market intelligence systems (70+ region and domain-specific Big Data Analytics Dashboards), ecosystem mapping, and advanced data visualization modalities, which can be used to enhance the existing products and services, internal operations, strategies and tactics, and externally-facing business development, engagement and relations activities of other companies.

These solutions come in a variety of shapes and sizes from full-scope end-to-end White Label Solutions to individual component-based SaaS models easily integratable into existing websites, platforms, products and services. Moreover, they often also feature use-case plug-and-playability, with relevance not only for enhancement of existing product offerings but also as tangible tools for optimizing internal company operations (e.g., competitive intelligence and market monitoring, semi-automated business development, engagement and relations-at-scale, etc), and as tangible brand enhancement assets (e.g., upgrading company websites to bring their investment and partnership relations activities to a new level of technological sophistication).

Our suite of 70+ region and industry-specific [Big Data Analytical Dashboards and Market Intelligence Systems](#) have been designed with plug-and-play customization, repurposing and easy reconfiguration in mind, and can be very time-efficiently repurposed to meet the needs of clients, whether as proprietary systems for internal use or as branded products for their existing users and clients. Meanwhile, many of their individual components have also been designed for easy extraction and integration into external platforms and systems.

Similarly, the large number of unique, interactive, plug-and-play [advanced data visualization modalities](#) that we have developed as part of our [Ecosystem Mapping-as-a-Service](#) projects (270+ platforms made to date) have been designed for easy plug-and-play integratability with external websites and company brand assets, offering clients a straightforward way of enhancing the level

Section 3: Deep Knowledge Group Flagship Projects and Products

of technological sophistication, interactivity and engageability of their brand's public face, many of whom have found them to be game-changers in terms of investment and partnership relations.

We also offer a variety of [intermediate SaaS](#) solutions like Dashboard Constructors that are in the middle-ground between the two ends of End-to-End White Label Solution and individual component SaaS, enabling clients to use our technology to develop analytical, market intelligence and ecosystem mapping products and projects of their own, using their own data, with no-code plug-and-play ergonomics and ease-of-use.

Co-Investment into Deep Knowledge Group Projects

DKG has for the past several years invested in and subsidized the development expenses of a majority of its projects and products by preference, for a number of reasons, including:

- Retaining full and definitive ownership over the unique IP and technical, technological and methodological assets of our projects
- Complete freedom to direct, formulate and adjust project strategy and tactics without oversight from external investors (A.K.A a 'no-hidden-strings' approach to project development)
- The ability to utilize the major products, systems and outputs of those projects for our own internal use (e.g., for competitive intelligence, market monitoring and overall corporate strategy and tactics optimization), which is the case for a large number of such projects
- For reasons of technological secrecy, security and defense, especially with regards to projects dealing with highly advanced (next-generation) technology development, to ensure that trade secrets directly pertaining to the project as well as more general DKG internal systems, tech stacks, techniques and methodologies used across many projects are kept internal to DKG.

However, we are also open in select cases to co-investments into projects by external counterparties, especially co-investors of a strategic nature capable of providing unique non-monetary value contributions to the projects beyond their capital contributions, and are open to offers in this regard on a project-by-project basis.

Partnership Platform: Make Sales, Engagements, Partnerships and Business Development Relations on Deep Knowledge Group's Behalf

We have developed a comprehensive, sophisticated and easy-to-use [Partnerships Platform](#) that aggregates the full scope of DKG's own internal semi-automated Business Development and sales tools, platforms, email and proposal templates, contracts and Project Data Rooms, enabling our regional partners to conduct engagements on DKG's behalf on a commission basis using the same array of tools that we use ourselves to conduct business engagements and relations in a maximally efficient, personalized, trackable, monitored, data-driven and technologically sophisticated manner.

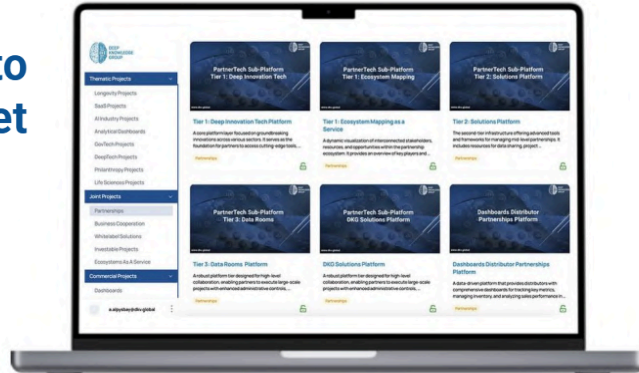

DKG developed the platform in direct response to a high degree of demand from external contacts who have found the sales and partnerships potential of our projects within their own professional networks to be unusually high, due to the high degree of uniqueness and technological sophistication of our products and projects. To better leverage such synergies, we connect our projects with individuals having already well-developed networks with large potential appetite for

Section 3: Deep Knowledge Group Flagship Projects and Products

our projects, and give them the materials, BizDevTech tools, techniques and templates to pitch our products easily and time-efficiently.

Begin the process by completing the partnership application form, providing key details about your expertise and interest areas. This form serves as the initial step to showcase your alignment with Deep Knowledge Group's vision and capabilities.
- 02** **Review and Assessment**

Once your application is submitted, the Deep Knowledge Group admin team conducts a thorough review. If selected, you will be invited to an introductory call to discuss potential collaboration opportunities. During this stage, you will also be asked to share your portfolio to demonstrate your experience and value proposition.
- 03** **Project Selection and Agreement**

After the review, you will choose the specific products and solutions you are interested in promoting. If you require additional support, such as marketing materials or networking assistance, Deep Knowledge Group will provide tailored resources to ensure your success. Following these discussions, a formal partnership agreement will be signed to solidify the collaboration.
- 04** **Access and Engagement**

Upon signing the agreement, you will gain exclusive access to the PartnershipTech Platform. This state-of-the-art platform offers detailed insights into all projects, an in-depth view of Deep Knowledge Group's BizDevTech technology stack, and the tools and resources needed to excel in your business development efforts.

Scenarios for Cooperation

SCENARIO #1: Establishment of Joint Ventures, Projects and Products

SCENARIO #2: Use Our Solutions to Improve Your Own Product and Service Offering (White Label Solutions and SaaS)

SCENARIO #3: Co-Investment into Deep Knowledge Group Projects

SCENARIO #4: Make Business Development Relations, Partnerships and Sales on Our Behalf via our Partnership Platform

Deep Knowledge Group is open to cooperation with a wide variety of organization types according to a range of collaboration scenarios including commercial, pro-bono and strategic.

Whether you are interested in establishing a **joint venture, project or product** with us, integrating one of **our solutions into your own products** or internal corporate systems and workflows, becoming a **regional partner** and making sales and engagements relations on our behalf, or becoming a **co-investors into our projects**, we want to hear from you.

Interested parties can register their interest via one of our dedicated cooperation type-specific platforms (e.g. our [Open Projects Platform](#), NDA-protected [Full Projects Platform and Data Rooms](#), or [Open Partnerships Platform](#)) or contact us directly at cooperate@dkv.global
