

Longevity.Capital

Specialized Hybrid Investment Fund for the Longevity Industry

Longevity.Capital is a hybrid investment fund specifically focused on the Longevity Industry, backed by seasoned professionals who have been active in both the investment banking and Longevity industries for 25+ years, long before the sector was recognized as a serious prospect by the overwhelming majority of investors. The fund structures its portfolio based on sophisticated industry intelligence and comparative analytics provided by the world-leading Longevity Analytics entity Aging Analytics Agency, which uses hundreds of quantitative and fact-based parameters to identify prospective investment targets for the fund, utilizing multidimensional analytical frameworks as complex as the industry itself.

Longevity.Capital delivers capital appreciation through investment in a carefully selected portfolio of companies in the Longevity sector, using the best Longevity industry analytics available. Its management team includes Dmitry Kaminskiy, a well known DeepTech investor who made his first investments in the Longevity Industry in 2014, and Eric Kihlstrom, former Director of the UK Government-Led Healthy Ageing Industrial Challenge Fund. The fund brings together experienced professionals in the investment, financial, legal and Longevity spheres, with a management team as diverse as its portfolio, to fully optimize Longevity investing and to build an InvestTech-powered bridge between Longevity startups and the investment community.

Hedged Risk Through Maximum Diversification

Venture 2.0 Novel InvestTech Solutions

AgeTech, Geroscience, Precision Preventive Medicine, AI Longevity FinTech

Backed by the World Leader in Longevity Industry Intelligence & Analytics

Fund Managers with 25+ Years of Experience in the Longevity Industry

Investment Thesis

The Fund will use highly diversified and de-risked strategy, seeking to acquire positions in at least 20 best companies out of 100 leading companies comprising the Longevity sector, thereby providing exposure to the entire industry. In this way, rather than betting on separate most-promising companies within the sector, the fund will appreciate capital based on the impending success of the entire Longevity industry.

Market Intelligence

Aging Analytics Agency, serves as the main source of expertise behind Longevity.Capital, providing sophisticated Longevity Industry analytics in order to develop and de-risk the fund's sophisticated investment strategy.

Aging Analytics Agency currently serves as the major source of expertise and analytics for the UK All-Party Parliamentary Group on Longevity, and is serving as one of the primary contributors to the development of the upcoming blueprint of a UK National Development Strategy for Healthy Longevity.

For early-stage startups, it applies assessment based on several dozen parameters, whereas for the more advanced leading companies more than 100 factors are considered. The higher degree of complexity of the Longevity industry requires novel, more sophisticated approaches to be aligned with the increased complexity of the industry landscape, in order to be capable of deploying relevant industry intelligence and analytics to develop and guide modern and applicable investment strategy for the Longevity sector. It is uniquely positioned to provide unparalleled Longevity industry market intelligence aggregated and refined through its 5+ years history as the only analytical firms exclusively dedicated to Longevity industry analytics, benchmarking and forecasting.
