Longevity AI-Assistant

User interface languages: English, German and French

Longevity Bank's mobile app uses **AI assistants** to provide daily targeted **recommendations** to Longevity Cardholders on ways that they can optimize their personal Healthy Longevity across its full scope – all the way **from healthspan to wealthspan**.

The Longevity Card Mobile App utilizes **AI-driven smart-matching** in order to suggest relevant products, services and tools from the Longevity Marketplace available online and physically (within their area of residence) based on each client's unique profile, including their current:

- **Physical health**, evaluated by in-depth biomarker analysis
- **Mental health**
- **Financial status**
- **Language**
- **Location**

Example recommendations include: healthy food restaurants, progressive sport centers, supplement shops, personalized and precision health clinics, insurance companies providing the best modern InsurTech solutions, etc.

Digital Health Avatar

- The very first step in the longevity plan offered to the club members is the development of a **Digital Health Avatar**.
- A **virtual profile** of all health data can be generated through the collection of multiple types of data, some of which are also visualized in 3D through devices or augmented reality.
- **Biomarkers** are specific parameters found in an organism that serve to diagnose issues, evaluate the overall health status, and predict the Ageing rates of each individual.
- With the technologies of healthcare advancing, the Digital Avatar will evolve from a data collection and disease-focused tool to a **truly Longevity-focused tool**.
- Instead of focusing on single-dimensional, disease-linked indicators, it will enable examination of the **whole organism** from an overall health perspective, with a primary emphasis on **prevention** and patient **healthspan extension**.

Digital Avatar is a graphic representation that is associated with a user to serve as their identification.
