

Charity, Philanthropy and Social Impact Platform 2.0

Philanthropy.International aims to remove existing barriers in the Philanthropy sector and to add value for all stakeholders with its Big Data Analytics System & Dashboard, an innovative system that analyzes and benchmarks the global philanthropy, charity and impact investment industry ecosystem using sophisticated, pre-validated Big Data, Machine Learning and AI techniques, constituting the first end-to-end platform to enhance decision making among donors, charities and NGOs.

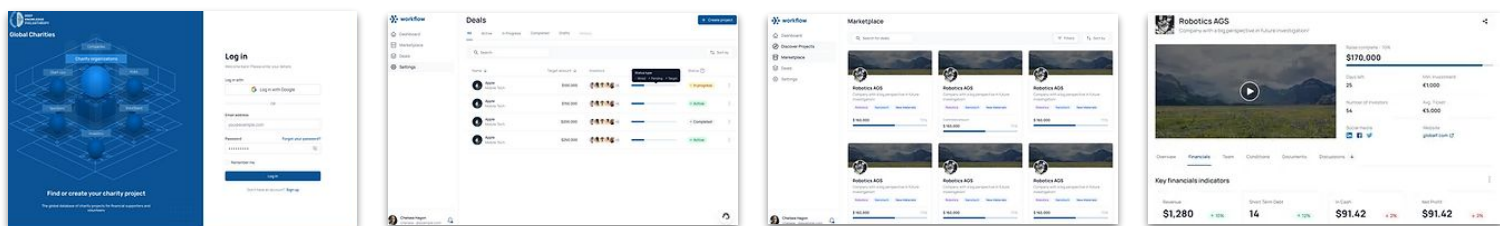

Our mission is to make the Global Philanthropy Industry more efficient, transparent, accountable and socially impactful.

- Global Philanthropy and Social Impact IT Platform
- Modern approaches for venture philanthropy
- Sophisticated donor-project matching algorithms
- Collaborative solutions designed for charity projects
- Robust transparency and accountability mechanism

Philanthropy Platform

Philanthropy Platform serves as a collaborative solution aiming to connect charities, nonprofits, sponsors, and volunteers of the philanthropy industry. The primary goal of Philanthropy.International is to effectively resolve the issue of transparency for both types of users. This unique approach is developed to eliminate the concerns of philanthropy industry players regarding the proper money allocations in the charity sector.

Philanthropy Industry Big Data Analytical System and Dashboard

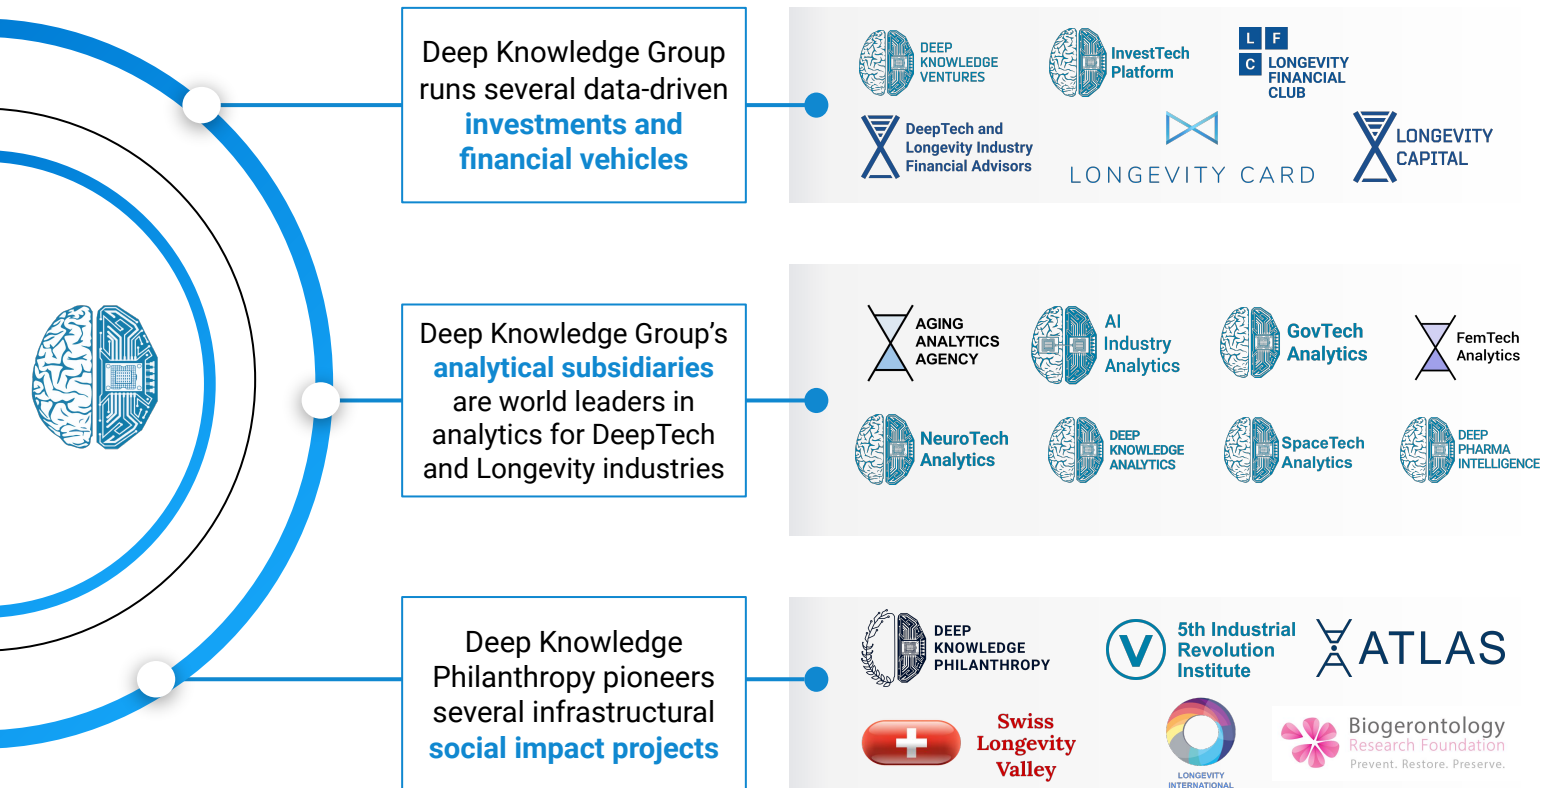

Philanthropy Industry Analytical System and Dashboard is designated for two major types of users: charity sponsors and donors. Each of them involve the range of specific organizations engaged in philanthropic activities. The primary goal lies in delivering on-demand market intelligence analytics through data coverage across the Philanthropy Industry.

- Advanced AI-Driven Analytics
- Blockchain-Based Donation Tracking System
- Transparency Tracking and Accountability Mechanisms
- Supply-Chain and Transparency Tracking System
- Charity Performance Rankings and Benchmarking
- Intelligent Donor-to-Project Smart Matching System

**Philanthropy.International** is a next-generation platform built by **Deep Knowledge Philanthropy**, a subsidiary of **Deep Knowledge Group**, driven by the vision of deploying frontier technologies to efficiently maximize social impact and create social good. We have a core belief that technology is an effective tool to drive social change and impact, herein lies the core mandate of **Philanthropy.International** - to deploy frontier technologies (**Big Data Analytics, Artificial Intelligence, Blockchain**) to tackle the vastly different social challenges in global philanthropy to build a more equitable world.

Its activities are backed by a robust array of **quantitative analytics** produced by Deep Knowledge Group's **10 analytical subsidiaries**, implementing the most advanced approaches to benchmarking, predictive forecasting and data-driven strategy formulation and execution in order to deliver **10x-20x the social impact and ethical ROI** per euro than the nonprofit and philanthropy sector average, while using Deep Knowledge Group's extensive distributed international network for highly efficient and productive engagement with Governments, Progressive Corporations, Top-Tier Media, Industry Influencers, Investors, Policy-Makers a wide range of other high-caliber and strategically relevant personalities and organizations.
