Techno-Philanthropy in UK Summary

BETA VERSION

Philanthropy.International is an open-access platform seeking to become a democratized and universally-accessible environment for community building, impact-matching and knowledge generation within the global philanthropy ecosystem, and to champion Techno-Philanthropy as a new paradigm for social impact. Developed by UK-based non-profit Philanthropy.International with the support of Deep Knowledge Philanthropy, the platform is designed to maximize social impact by harnessing the power of big data and analytics while connecting all stakeholders in the global philanthropy sector.
